

Economic Commission for Europe**Inland Transport Committee****Working Party on the Transport of Dangerous Goods****Joint Meeting of the RID Committee of Experts and the
Working Party on the Transport of Dangerous Goods**

Bern, 10-11 September 2020 and Geneva, 14-18 September

Item 5 (a) of the provisional agenda

**Proposals for amendments to RID/ADR/ADN
pending issues****Classification of UN 1872 LEAD DIOXIDE****Transmitted by the Government of Germany^{*,**}****Introduction**

1. At the last Joint Meeting in September 2019, Germany submitted informal document INF.25 for the harmonisation of the classification of UN 1872 LEAD DIOXIDE, see also paragraph 41 of the report of this session (ECE/TRANS/WP.15/AC.1/156).
2. Currently UN 1872 LEAD DIOXIDE is classified differently within the UN Model Regulations, the IMDG Code and RID/ADR/ADN.
3. Whilst UN 1872 LEAD DIOXIDE is classified in RID/ADR/ADN as 5.1 + 6.1, packing group III, the UN Model Regulations and the IMDG Code classify the substance as Class 5.1, packing group III, with no subsidiary risk.
4. Checks have revealed that there is no reliable evidence for acute toxicity justifying the subsidiary risk of Class 6.1.
5. The reasons for the current entry in RID/ADR/ADN are unknown.
6. Germany has examined the question raised at the last Joint Meeting by the United Kingdom regarding carriage in bulk. Germany is of the opinion that there are no safety concerns regarding the carriage of UN 1872 LEAD DIOXIDE in bulk by land. Thus, in line with the applicable provisions for other substances of classification code O2 of packing group III, the two codes VC1 and VC2 as well as the corresponding provisions AP6 and AP7 should also be inserted in column 17 of Table A in Chapter 3.2.

* 2020 (A/74/6 (Sect.20) and Supplementary, Subprogramme 2).

** Circulated by the Intergovernmental Organisation for International Carriage by Rail (OTIF) under the symbol OTIF/RID/RC/2020/53.

Proposal

7. Germany proposes to harmonise the classification of UN 1872 LEAD DIOXIDE and to delete subsidiary risk "+ 6.1" in column (5) of Table A in Chapter 3.2 of RID/ADR/ADN.

8. This amendment would require the following consequential amendments in Chapter 3.2, Table A:

In column (3b), amend "OT2" to read:

"O2".

In column (12), amend "SGAN" to read:

"SGAV".

In column (17), insert:

"VC1

VC2

AP6

AP7".

In column (18), delete:

"CW28/CV28".

In column (20), amend "56" to read:

"50".
