

Report to WP.29 about the activity of the Informal Working Group on Periodical Technical Inspections

The group continues to review the following draft documents:

- the framework document on in-service compliance assessment the vehicles including automated/autonomous vehicles and their components;
- draft UN Rule on Accident Emergency Call Systems (AECS);
- guidance for road-side technical inspections and enforcement.

From February 2020 the group works virtually.

The Terms of Reference of the group had been adopted by the WP.29 at its 175th session held on 19-22 June 2018.

The group asks the WP.29 to extend its mandate. WP.29 may discuss an option of permanent mandate for IWG on PTI, without time limit. The activity of the group should be, by definition, continuous in the time.
