

Q Dummies into UN Mutual Resolution No. 1

68th Session of GRSP

Q dummies used in UN R129 are not officially defined although related space was reserved in MR1. Unfortunately this issue has not been addressed till now. So there seems to be a need to start to work on the amendment of MR1.

We would appreciate if a Task Force (dummy manufacturers, CRS manufacturers, vehicle manufacturers, technical services and contracting parties) could start to work on an amendment of MR1 for Q Dummies in 2021.

Germany is seeking for guidance of GRSP on this issue.
