

ANNEX III: PARTICIPATING UN ORGANIZATIONS STRATEGY FOR THE 2020 CALL FOR PROPOSALS

UNEP

I. Overall approach to UNRSF 2020 Call for Proposals

The UNEP Sustainable Mobility Unit promotes sustainable, low-emission transport and works to reduce the sector's contribution to air pollution, climate change and road fatalities and injuries. Our expertise in road safety is delivered through two key programmes:

- Infrastructure - investing in non-motorized transport for pedestrians and cyclists which helps reduce emissions and improve air quality and road safety;
- Used vehicles - supporting countries globally to clean up the global vehicle fleet and introduce national standards and regulations to stop dumping of old, polluting and unsafe vehicles that fail environment and safety inspections.

Our work is embedded in our approved UNEP programme of work under two sub-programmes:

- Chemicals, Waste and Air Quality;
- Climate Change.

The UNEP Sustainable Mobility Unit is a global leader in supporting national and city governments worldwide (Africa, Asia, Latin America and the Caribbean and Europe) shift to sustainable mobility with a comparative advantage and vast experience focused on policy and regulatory change.

Our approach to the UNRSF 2020 Call for Proposals will be to support other UN Agencies with a particular focus on the legislative area of the safe system approach - to promote sustainable regulatory change for safe users and safe roads.

II. Application strategy

At this stage we are not accepting applications of interest from external stakeholders. We will be working collaboratively with other UN Agencies to submit a proposal and if successful, at that stage, we will follow due process to identify partners.
