6. Core Components Developed and their UN/CEFACT Registry Version Used ............... 7
7. Logical Message Structure .............................................................................................. 7
1. **Objective**
The objective of this document is to identify the complete set of the class diagrams to be used to transform the business requirements shown in the BRS (Small Scaled Lodging House Reservation Information Process 17 Oct., 2012) into the target technology solutions expressed in this document.

2. **Definition of Terms**
All terms are defined in the said BRS.

3. **Target Technology Solution**
The target technology is XML schema and is based on UN/CEFACT Technical Specification Version 2.

4. **Information Payload to be Implemented**
4.1 **Conceptual Data Model**
The class diagrams of Small scaled Lodging House Reservation Information Process are shown in the following figures. Figure 1 shows Lodging House Reservation Class in Lodging House Reservation Request and Response Message, and Figure 2 shows all the relevant classes in Lodging House Reservation Class.
4.2 Canonical Data Model
The Canonical Data Model is the same as in the Conceptual Data Model.

5. Business Information Entity Reference
All the business information entities developed for this process, including ABIEs, BBIEs, and ASBIEs, are shown in the file embedded in this chapter in the form of UN/CEFACT harmonization template.

SLHReservationBIE2
0121101.xlsm
6. Core Components Developed and their UN/CEFACT Registry Version Used

The Core Component Library version used in this document is D12A. All the core components developed for this process, including ACCs, BCCs, and ASCCs, are shown in the file embedded in this chapter in the form of UN/CEFACT harmonization template.

7. Logical Message Structure

The Message Assembly is shown in the file embedded in this chapter, which is based upon the message structure for Lodging House Reservation Request and Response Message shown in Figure 1.

(End)
