Messages

SDG6 progress report 2018:

- SDG 6 targets must be turned into national objectives and adapted to the country context
- Effective water resources management needs more and better data

NDCs - on water and sanitation:

- Mostly very general statements
- Little attention to water and sanitation
- Hardly specific goals for water and sanitation

NDCs (2020) considering water and sanitation

All 63 NDCs

- No Water and Sanitation
- Mention Water and Sanitation
- Goal for Water and Sanitation

Outside pan-European region

- No Water and Sanitation
- Mention Water and Sanitation
- Goal for Water and Sanitation

Some good examples

Republic of Moldova

- Promote sustainable and resilient access of the population to adequate quantities of acceptable quality water
- Improve treatment of wastewater and domestic water

Angola

- Increase water availability through village-level wells and boreholes
- Extend water and sanitation network to rural areas

Mexico

- Ensure the quantity and quality of water in human settlements with more than 500,000 inhabitants and increase the treatment of industrial and urban wastewater

Recommendations

- Reduce silo approach by developing integrated climate policies, including water and sanitation
- Include water and sanitation measures in NDCs
- Possibly use SDG national targets in NDCs

Thank you for your attention!
