QUESTIONNAIRE ON DATA COLLECTION PRACTICES

UNECE Workshop on Measuring Poverty in Pandemic Times, 25-26 March 2021, online

The objective of the questionnaire is to gather information prior to the Workshop on countries' data collection practices. A special attention is given to the impact of the pandemic and how countries are adapting their survey procedures to the new requirements. Please send us your replies by **17 March 2021** in order to be able to translate and review them on time. The replies will serve as a background information for the Workshop and aim to help address more precisely the countries needs during the training.

DAY 1: TRAINING ON NEW APPROACHES, METHODS AND GOOD PRACTICES OF SURVEY-TAKING IN THE PANDEMIC CONTEXT

1. *What data collection methods did you use before the pandemic? How have these changed due to the pandemic?*
2. *What are the challenges you have faced for data collection during the pandemic?*
3. *Do you use incentives to encourage response and boost response rates (for example, the UK Office for Nationals Statistics, could offer monetary (e.g. £5, £10, £15 vouchers) and non-monetary incentives (e.g. a re-usable shopping bag)?*
4. *What materials do you send to respondents prior to their surveys?*
5. *Who are your 'hard to reach' groups?*
6. *Are you collecting any Covid-19 related information on your surveys?*

DAY 2: DISAGGREGATED DATA TO ASSESS THE IMPACT OF THE PANDEMIC ON THE MOST VULNERABLE

7. *Have you ever calibrated survey weights to treat non-response, non-sampling error and bias? If so, what tool have you used?*
8. *What auxiliary information, such as demographic and socio-economic, can you link to your survey samples?*
9. *How often during a survey do you monitor response (daily, weekly, monthly)?*
