SDGs Progress Measurement in Ukraine Based on UNESCAP Methodology
In 2017 Sustainable Development Goals: Ukraine National baseline Report was adopted, where global SDG targets were nationalized

Decree No 722/2019 of the President of Ukraine dated September 30, 2019 on Sustainable Development Goals of Ukraine for the period till 2030 foresees the SDGs shall permeate programme documents, draft legal texts to ensure balanced economic, social and ecology domains of Ukraine’s sustainable development.

Regulation # 686-p of the Cabinet of Ministers of Ukraine dated August 21, 2019 on the issue concerning data collection to monitor the SDGs implementation approves the nationalized list of SDG indicators and empowers the State Statistics Service of Ukraine with ensuring collection and making these data public, as well as with coordinating activities to develop metadata under the indicators.
The State Statistics Service of Ukraine is the coordinator of data collection for monitoring of the SDGs

Recently Monitoring report Sustainable Development Goals Ukraine-2020 has been prepared by Statistics Ukraine supported by the United Nations in Ukraine and UNICEF Ukraine highlighting available information for 2015-2019 according to Regulation # 686-p of the Cabinet of Ministers of Ukraine and their target values for 2020

Available at:
In 2020 the State Statistics Service of Ukraine jointly with VoxUkraine supported by UNDP Ukraine made a pilot of measuring the SDGs progress in Ukraine using UNESCAP’s methodology and on the basis of the SDGs Voluntary National Review.

In case with Ukraine the progress was measured for 110 out of 183 national indicators for SDGs approved by the regulation of the Cabinet of Ministers of Ukraine dated 21.08.2019 #686-p “Issue of Collecting Data for Monitoring of the Sustainable Development Goals Implementation” having the target values for 2030.
Two principal measures were used to assess Ukraine’s progress towards the SDGs: Current Status Index and Anticipated Progress Index. The indices answer two different questions: how much progress has been made since 2015? How likely will the targets be achieved by 2030?

Anticipated Progress Index (dashboard) in Ukraine is a unique tool to show where the acceleration is needed to reach the target (marked with yellow), maintaining the pace (green) or reverse trend (red) is needed to achieve the target, as well as what targets cannot be measured, as grey color means missing data.
