Amendment proposal

Paragraph 5.5.1

If a setting makes it possible for the driver to choose between a total distance recorded by the vehicle since its entry into service in kilometres and miles, then the distance may be displayed **only** in either kilometres **and/or** miles **at any one time**.

~~The corresponding unit shall permanently be displayed. An odometer value shall not be displayed without its corresponding unit.~~”

Justification

Wording in red clarifies that:

- a. distances may be:
 - i. displayed in km (C) or miles (D), or
 - ii. simultaneously in km and miles, and that (E)
- b. a value must always be displayed with its corresponding unit ((A) & (B) are prohibited)
