

WATER
CONVENTION

Progress in implementation of PoW for 2019-2021 and main directions of work for 2022-2024

Third joint meeting of the Working Group on IWRM and Working Group on Monitoring and Assessment

26-28 April 2021

IWAC

Programme of Work for 2019-2021

Progress in implementing

- **Supporting monitoring, assessment and information sharing in transboundary basins**
- Development of cooperation on water quality
- Hydro meteorological services
- Joint monitoring database

- **Promoting an integrated and intersectoral approach to water management at all levels**
- *Safety of hydraulic structures*
- *Water allocation and environment assessment in the transboundary context*
- *Development of cooperation in using water and energy resources*

- **Adapting to climate change in a transboundary basins**
- *Integrated drought management in a transboundary context*

Programme of Work for 2019-2021

Progress in implementing

Development of cooperation on transboundary river Syrdaria

- *support to the Joint KZ-UZ Working Group on water quality of Syrdaria river*
- *development of the joint actions on prevention of accidental pollution of Syrdaria river*
- *implementation – to be launched in July 2021*

Capacity building on Hydro-meteorological Services

- *Memorandum of understanding between KZ and SK MoEP on support to IWAC*
- *Training on hydro-meteorological services*
- *implementation - September – October 2021*

Main areas of work for 2022-2024

- **Supporting monitoring, assessment and information sharing in transboundary basins**
- **Promoting an integrated and cross-sectoral approach to water resources management at all levels**
- **Reporting on SDG 6.5.2 and implementation of the Convention**

Supporting monitoring, assessment and information sharing in transboundary basins

Objective: to assist countries in developing coordinated monitoring and assessment, as well as data exchange in transboundary basins

Planned activities:

- Support on updating the Convention's guidelines on monitoring and assessment:
- Assistance in the development of joint actions to prevent water pollution in transboundary basins

Promoting an integrated and intersectoral approach to water resources management at all levels

Objective: to assist Eurasian countries in implementing integrated water resources management in transboundary basins

Planned activities

- Promote intersectoral solutions based on the water, food, energy and ecosystems nexus
- Promote integrated water resources management in the transboundary basins
- Assistance in the safe management of hydraulic structures

Reporting on Sustainable Development Goal indicator 6.5.2 and under the Convention

Objective: to assist countries to facilitate the achievement of SDG 6.5.2.

Planned activities

Facilitating the use of reports to improve transboundary water cooperation:

- support to countries in the preparation of the third reporting
- regional meeting on the exchange of experience in the use of reports as a tool for the development of cross-border cooperation

Schedule for development of the PoW for 2022-2024

Thank you for attention!
