69th Session of the Commission

GRODNO, Belarus
Population: 357,000 people

Area: 142 km²

Ethnic Composition:
Belarusians, Poles, Russians, Jews, Ukrainians, etc.

Religious Composition:
Orthodox, Catholics, Protestants, Jews, etc.

The city’s unique historical center – monument to the XII-XX century urban planning style

GRODNO IS HOME TO 451 BELARUSIAN HISTORICAL AND CULTURAL SITES, 388 OF WHICH ARE LOCATED IN GRODNO CITY CENTER
Opened in 2017

In 2020, the facility treated 162,000 tons of waste

44,000 tons were used by the enterprise

6,000 tons of recycled materials were generated.

The sale of recycled materials amounted to 25% of the total revenue of the facility

In 2021, we plan to install additional equipment for deeper waste recycling, which will increase recycled material recovery up to 58%
120-apartment energy-efficient residential building 2nd generation

Saw the commissioning at March 2017

Innovative heating, ventilation and heat supply systems have been introduced. The technologies of recuperation, the use of heat from the ground, urban collectors and gray drains have been applied

Equipment and engineering solutions reduce traditional energy consumption

The average heat consumption in the house is 15 kWh per cubic meter per year. In energy-efficient houses of the first generation, this figure is 39 kWh
The largest green urban area is 4 parks - park «Kolozhsky», forest parks «Pyshki», «Rumlevo», «Lososno».

In 2019, the Rumlevo Forest Park was transformed into a botanical natural monument of local importance. Its total area is 1 km².
TRANSPORT INFRASTRUCTURE

Modern eco-friendly transport
15 self-powered trolleybuses (20% of the total trolleybus fleet)
Developed electric vehicle charging network

The fourth bridge across the Neman
will connect residential and industrial areas, facilitating the future creation of the city’s belt road
GRODNO, Belarus
