ENABLING SUSTAINABILITY PRINCIPLES IN RESOURCE MANAGEMENT

UNECE

**“ NEVER LET A
GOOD CRISIS GO
TO WASTE ”**

WISTON CHURCHILL

Why classification

Sustainable development

- At the service of the well-being of citizens as center of economic policy
- Consistent and reliable information on renewable energy projects
- Support responsible financing and investment
- Monitorization, standard report and efficient management of RE projects.
- Regulation and accounting >> transparency and efficiency to financial markets
- Government's policy and planning to SDG

Why classification

Intended uses

- Common reporting to stakeholders
- Global voluntary system

Desired outcomes

Value and collective approach

- Growth – rate vs direction with purpose
- Policy driven by public interest
- Public and private actors work together, co-creating value

- Idiot (from ancient Greece) – when someone is only concerned with private sector
- Public common goods – education, basic research or clean air

Desired outcomes

Markets and market shapping

■ What sort of markets do we need?

- **Quantity** of investment
 - **Quality** of investment
 - **Governance** mechanism
-
- Goal-oriented investment on the supply side
 - Market creation on the demand-side
 - Governance mechanisms
 - Achieve **inclusive, innovation-led sustainable growth.**

SUSTAINABLE DEVELOPMENT GOALS

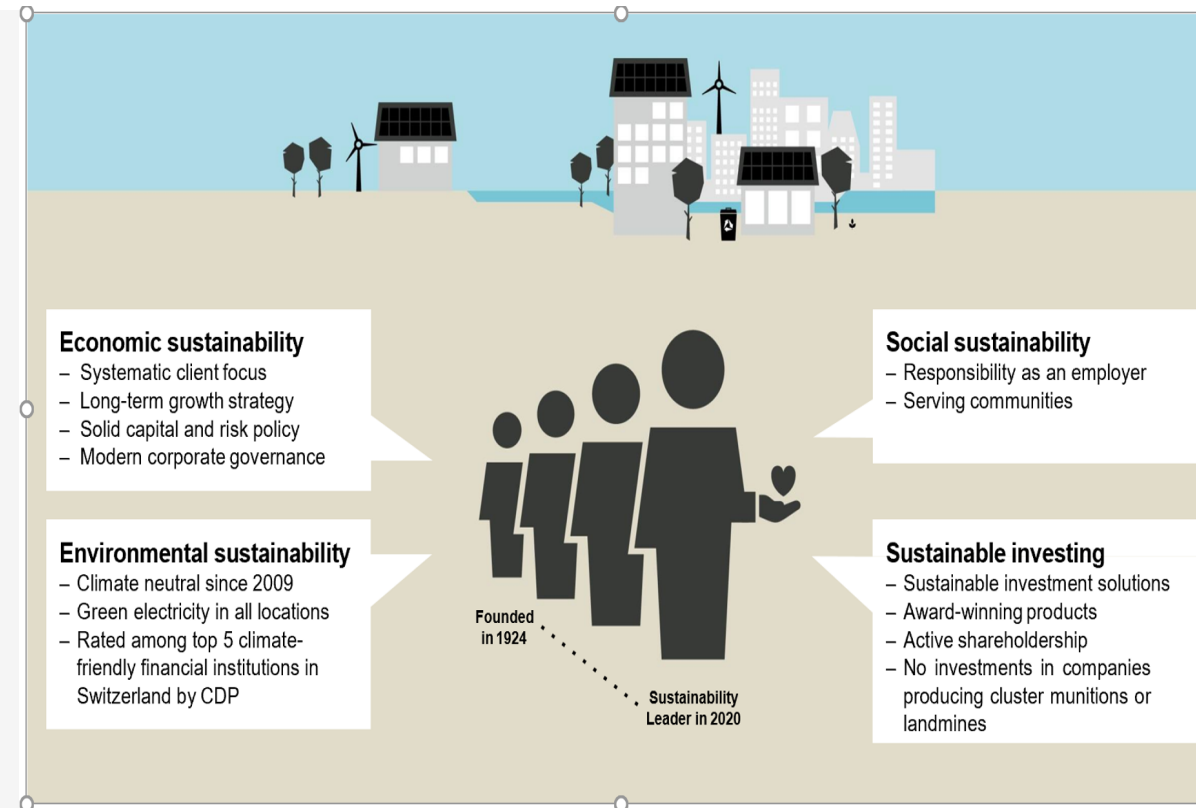

Desired outcomes

Sustainable financing

- **Long-term thinking**
- Productive capacity to make good use of money that is created and placed in private hands
- Strategic (public) investment
- Outcomes-based economy and finance serving the economy and not the other way around
