Vision and Strategy - Enabling Sustainability Principles in Resource Management
To implement 2030 agenda
"NEVER LET A GOOD CRISIS GO TO WASTE"

WISTON CHURCHILL
At the service of the well-being of citizens as center of economic policy

Consistent and reliable information on renewable energy projects

Support responsible financing and investment

Monitorization, standard report and efficient management of RE projects.

Regulation and accounting >> transparency and efficiency to financial markets

Government's policy and planning to SDG
- Common reporting to stakeholders
- Global voluntary system
Desired outcomes
Value and collective approach

- Growth – rate vs direction with purpose
- Policy driven by public interest
- Public and private actors work together, co-creating value

- Idiot (from ancient Greece) – when someone is only concerned with private sector
- Public common goods – education, basic research or clean air
What sort of markets do we need?

- **Quantity** of investment
- **Quality** of investment
- **Governance** mechanism

- Goal-oriented investment on the supply side
- Market creation on the demand-side
- Governance mechanisms
- Achieve **inclusive, innovation-led sustainable growth**.
- **Long-term thinking**
- Productive capacity to make good use of money that is created and placed in private hands
- Strategic (public) investment
- Outcomes-based economy and finance serving the economy and not the other way around

Source: Bank Vontobel at New RE Investment Conference, August 2020
Desired outcomes
Distribution and inclusive growth

- Strong conditions that foster inclusive and sustainable growth
- Equitable distribution of benefits
- Public funds as loans to private sector must guaranty reinvestment of profits back into areas that benefit the society
- Secure and affordable sustainable services
Thank you!
