

Reporting Strategies and Policies – Slovenia:

Domestic heating

PREPAIR LIFE Integrated project

CLRTAP - WGSR59, 18 - 21 May 2021

Reporting Strategies and Policies:

- Domestic heating

Country	Slovenia
Pollutants	PM, BC, NMVOC, NO _x , POPs
Protocols	Gothenburg Protocol POP Protocol
Sector	domestic heating, small businesses
Type of measure	legislation, national regulation, subsidies educational, informational

- PREPAIR LIFE Integrated project

Country	Italy, Slovenia
Pollutants	PM, BC, POPs, NMVOC, NO _x , NH ₃
Protocols	Gothenburg Protocol POP Protocol
Sector	transport, domestic heating, industry and energy, agriculture
Type of measure	project

Domestic heating

- **Decree on the emission of substances into the atmosphere from small combustion plants** ([Uredba o emisiji snovi v zrak iz malih kurilnih naprav \(Uradni list RS, št. 46/19\)](#))
 - limit values for pollutants from small stoves using solid, liquid or gaseous fuel,
 - TO DO: The next step is the adoption of methodology for the measurement of particulate emissions from small solid fuel stoves, which would allow chimney service providers to verify the emission compliance of old solid fuel stoves with the legislation.
- **Replacement subsidies for old woodstoves** from 20% to 60% of the investment (to 100% of the investment for low-income households):
<https://www.ekosklad.si/prebivalstvo/pridobite-spodbudo/seznam-spodbud/kurilne-naprave-na-lesno-biomaso>
- **Public awareness activities:**
 - A brochure about heating with wood:
<https://www.gov.si/assets/ministrstva/MOP/Dokumenti/Zrak/OPravilnemKurjenjuZLesom.pdf>
 - TV advertisement about heating with wood:
<https://www.youtube.com/watch?v=B4uOYR2aNEQ>
 - Web pages:

PREPAIR LIFE Integrated project

- PREPAIR (**Po Regions Engaged to Policies of AIR**) - (LIFE15 IPE/IT/000013):
 - **over-regional approach:** aims to implement actions in the territory of the Po Valley (**Italy**) and **Slovenia**,
 - to promote new lifestyles, production and consumption models that can reduce air pollutant emissions to improve air quality in the region,
 - focus on four main areas: **biomass burning, energy efficiency, transport and agriculture.**
- **Leading partner: Regione Emilia-Romagna** - Directorate General for Environment and for Soil and Coast Protection – **Italy**. *Slovenian Environment Agency* is also one of the partners.
- Lower emissions in Po Valley (Italy) => improved air quality in Italy and Primorska region (Slovenia).
 - **In Slovenia, ozone pollution** is characterized by pronounced influence of the **transboundary pollution**. The highest concentrations were measured in Primorska region bordering the region of Friuli-Venezia Giulia of Italy.

LIFE 15 IPE IT 013

YOU'VE GOT AIR!

Together for the
Policies of air quality

PREPAIR LIFE Integrated project

- **DURATION:** The project will last for **7 years** (from 1 February 2017 to 31 January 2024).
- **TOTAL BUDGET: 17 million euros** available to invest in 7 years: 10 million of which coming from the European Life Program.
- **COMPLEMENTARY FUNDS:** PREPAIR is an “integrated” project: over 850 million euros coming from structural funds and from regional and national resources of all partners for complementary actions related to air quality.
- **LIFE Prepair website:** <https://www.lifeprepare.eu/?lang=en>
 - LIFE Prepair - a video introduction to the project: <https://www.youtube.com/watch?v=4AZORvKCH3o>
