Statistical activities of Eurostat’s Transport Unit

Evi Ford-Alexandraki

Eurostat

Regular activities

Produce and disseminate European statistics on transport based on five legal acts and voluntary data collections

**Regulated statistics**
- Road freight transport
- Air transport
- Maritime transport
- Rail transport
- Inland waterway transport

**Voluntary collections**
- Regional statistics
- Common Questionnaire
- Safety statistics
Statistical development projects

- Modal split indicators
- Passenger mobility
- IWW – passengers and accidents
- Light utility vehicles
- Foreign rail operators
Modernisation of the IT for statistical production

- New transmission format
- New database system
- Improved data validation
- Re-structured dissemination database
