

ITF statistical activities

UNECE WP6 – June 9-11 2021

Aurélie Kopacz - Mario Barreto

Outline

- ITF data collections (where we stand)
- Next ITF Annual transport meeting
- Key transport statistics leaflet
- Statistics brief on Transport Infrast. spending
- Outlook for transport statistic
- ITF Summit

ITF Data Collections

- Annual Trends in Transport Sector :
 - 2019 data collected
 - [Statistics brief \(Dec 20\)](#)
 - July 2021 launch of a new data collection
 - Short-term :
 - T4 2020 collected and published
 - [Key Transport Statistics leaflet](#)
 - T1 2021 under collection (from 1st June)
 - Investments in Transport Sector :
 - 2019 data collected
 - Statistics Brief : June 15
 - Common questionnaire : Already discussed
- 

New databases release

ITF Transport Outlook database

- Urban and non-urban domestic passenger transport
- International passenger transport
- Urban and non-urban domestic freight
- International freight

- [Access outlook data](#)

Indian cities database

- Based on a study to help Indian stakeholders identify cost-efficient and sustainable pathways to mitigate the CO2 emissions from passenger transport in cities

- [Access to Indian cities database](#)

7th International Transport Statistics Meeting

**7-8 October 2021
Paris - OECD**

Save the Date !

Agenda will include:

- Discussion about covid impact
- Countries experiences
- New mobility and related data
- Gender issues

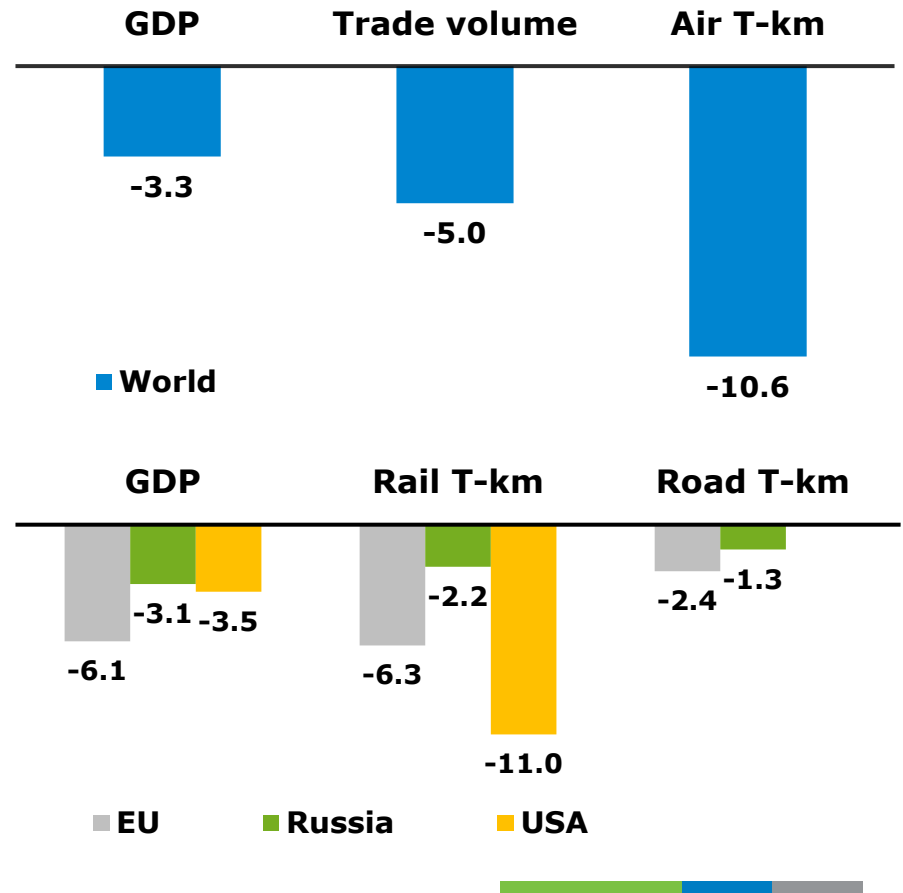

Key transport statistics

GDP, trade and freight transport in 2020 - **Decrease in freight transport in 2020**

Key Transport Statistics
2020 Data

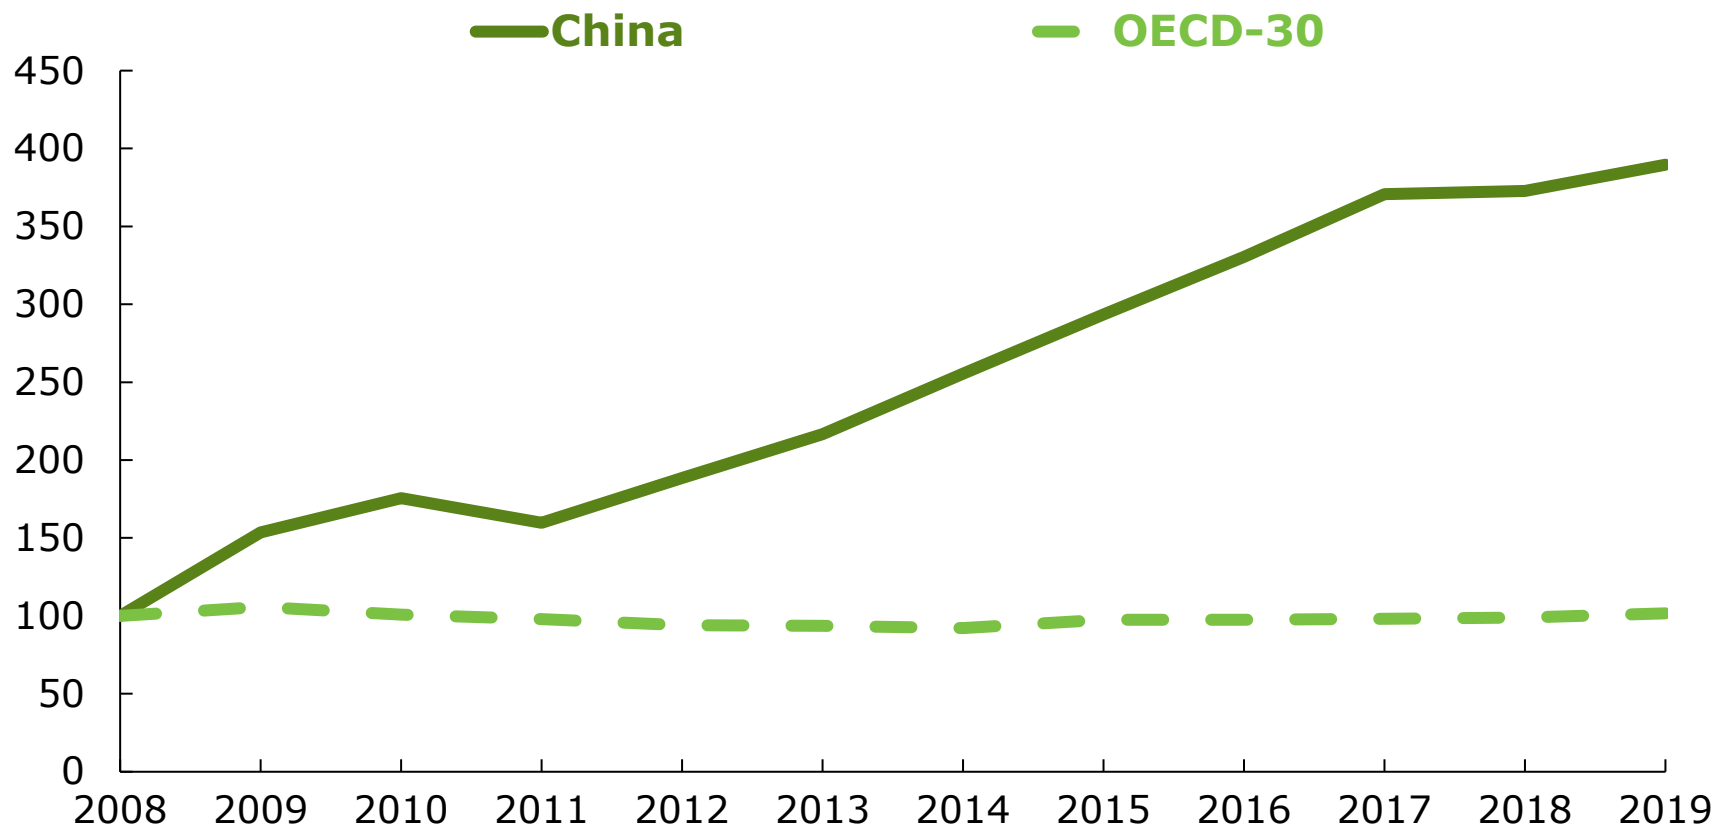

2021

% change from previous year

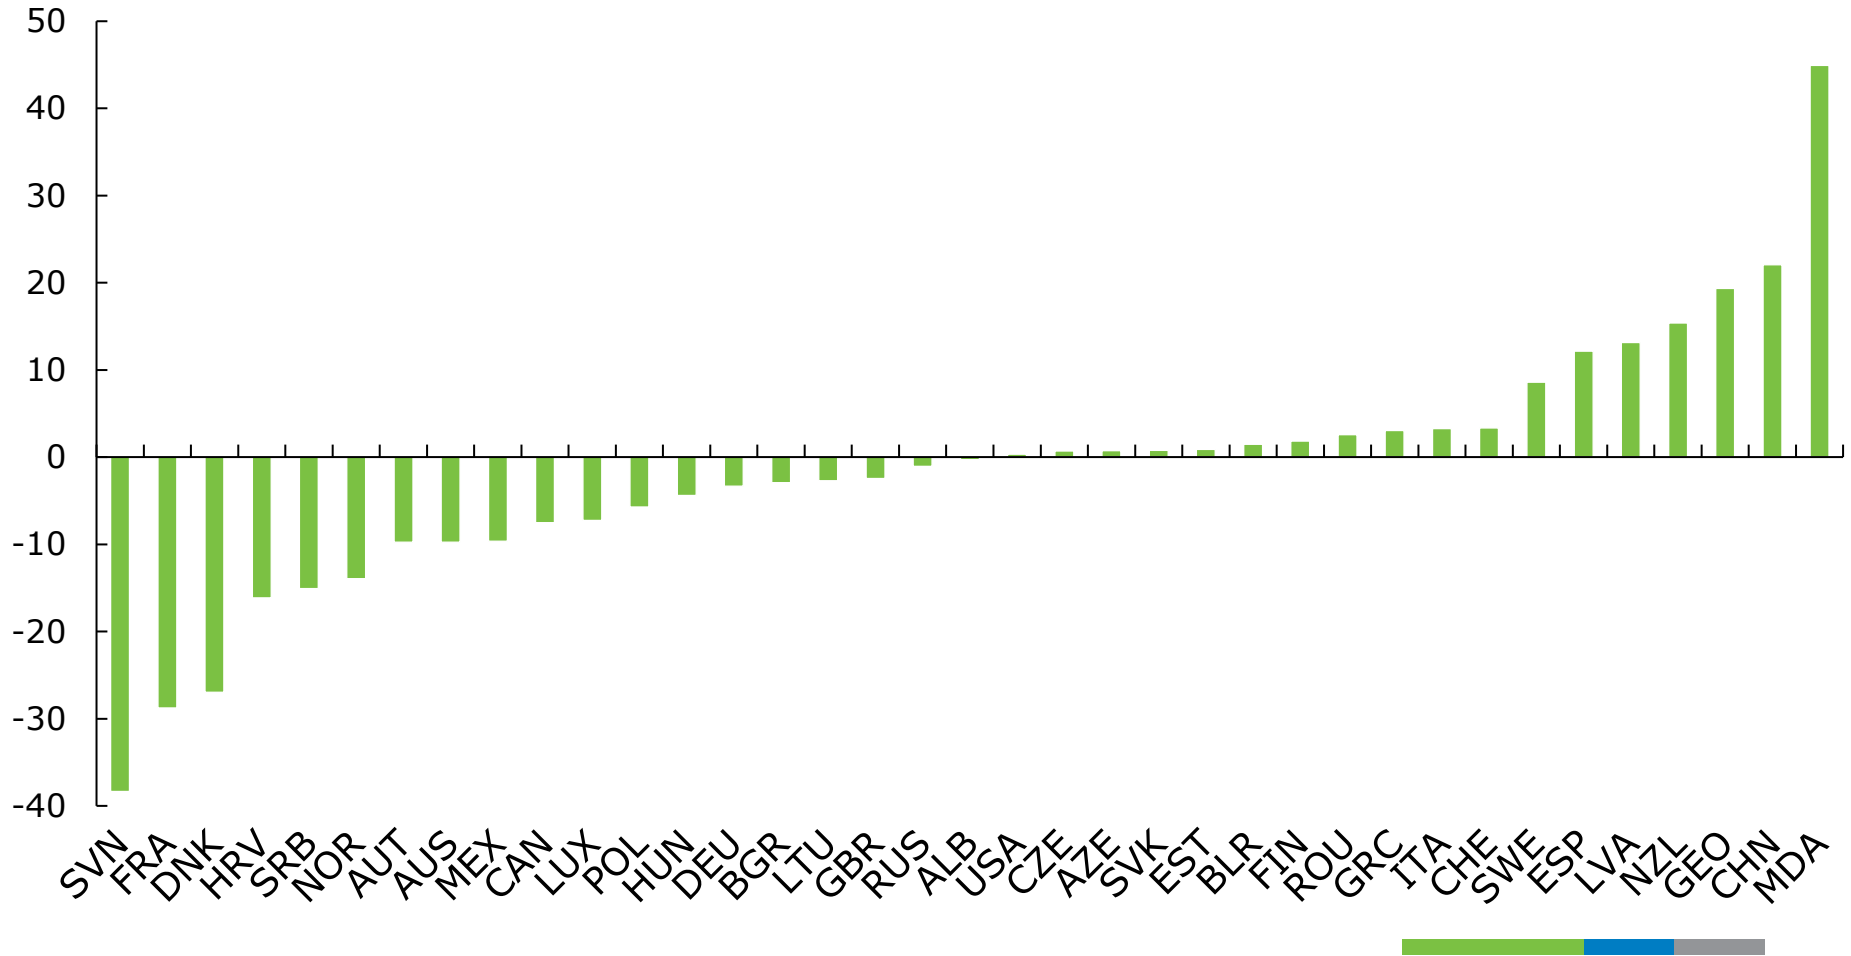

Volume of investment in inland transport infrastructure 2008-19 in China and OECD-30 – China still rising

Constant 2015 prices, 2008=100

Change in road share of inland transport infrastructure investments between 2008 and 2019

Current prices, difference

ITF Transport Outlook 2021

The ITF Transport Outlook project develops and analyses :

- forward-looking **scenarios** for global transport activity across all transport modes
- long-term prospects for transport **demand** to 2050

The 2021 edition focuses on :

- exploring policies to bring the ambitions of the **Paris agreement** within reach
- making **low-carbon** transport a reality
- review of our approach from mobility to **accessibility**
- **cross-sectoral** collaboration to achieve sustainability

ITF Transport Outlook 2021

ITF Summit – Transport & Innovation Virtual Meeting 17-28 May 2021

Ministers of transport from the 63 member countries of the ITF have agreed to use the recovery from the Covid-19 pandemic to transform transports.

Among other things, Ministers undertake to:

- promote **urban mobility** redesigns that build on the boom for walking and cycling during the pandemic;
- ensure that new technologies and innovative mobility options foster **equitable access** for all citizens;
- promote education and training and a more inclusive and fair workplace for all **transport workers**;
- encourage the use of **public transport**;
- foster **automation**, digitisation and data innovation,
- promote **innovation** in electrification, low- and zero-carbon fuels, hydrogen fuel cells and new-generation batteries
- promote intermodal transport and develop **interoperability**.

Thank you
