Economic Commission for Europe

Inland Transport Committee

Working Party on Intermodal Transport and Logistics

Sixty-fourth session

Geneva, 20–22 October 2021

Item 3 (c) of the provisional agenda

European Agreement on Important International Combined

Transport Lines and Related Installations:

Implementation of the Agreement

Comparison between AGTC and TEN-T railway lines and related installations – comparison of terminals

Note by the secretariat

I. Introduction

1. The Working Party on Intermodal Transport and Logistics (WP.24), at its sixty-third session, recognized that for the ECE member States that are at the same time members of the European Union, the implementation of the European Agreement on Important International Combined Transport Lines and Related Installations (AGTC) can be possibly achieved through the implementation of the Trans-European Transport Network (TEN-T) for railway lines. WP.24 requested therefore that a comparison of AGTC and TEN-T railway lines and related installations as well as their technical standards and operational parameters is prepared and presented at the sixty-fourth session.

2. This current document contains such a comparison for the terminals.

3. The table presented in section II lists in column 2 the places for TEN-T rail-road terminals as sourced from the Regulation (EU) no 1315/2013, while in column 3 the equivalent places of terminals from the AGTC are provided. Column 4 specifies any differences established.

4. WP.24 is invited to review and reflect on the results of the comparison for the terminals and consider the way forward.
