

# Data collection tool for survey monitoring and analysis

Marija Hinda and Nebojša Tolić (Statistical Office of the Republic of Serbia [SORS])

Expert Meeting on Statistical Data Collection, Online, 27-30 September 2021

# New tool for for survey monitoring and analysis

# Power Bi report – monitoring and analysis

Address book

Data entry bay days

Completed and blanks reports

Performance of interviewers

Analysis by sectors and activities

Analysis by territories

Include data from other survey

Easily detect errors and deviations

Rapid survey

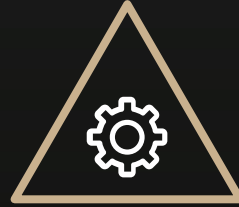

# Conclusion

The time for each phase in the data collection process is minimized.

The monitoring and analysis allows us to view the results from different perspectives.

The realization of the survey is raised to a higher level.

Quick and more realistic picture of the state of the economy.

# Data collection tool for survey monitoring and analysis
