

Summary of GRBP-74-06

Proposal for a new series of amendment to UNR109
3PMSF retreaded tyres approval

Informal document GRBP-74-06

New Series

- 01 series of amendment to R109

Scope

- Retreaded snow tyres for use in severe snow conditions

Status and submitted documents

- Contents
 - Currently
 - A test report signed by the Technical Service which performed or supervised the tests and by the TAA which notified this Technical Service is needed (Annex X, Appendices 2 and 3, §11 and §12).
 - 1st proposal (GBRP-73-21)
 - Explicitly ask the TAA to sign the test report of the TS
 - New proposal
 - Granting an approval of the pattern (precured tread or mould cure)

New proposal

- Part I
 - Plant approval for standard tyres (no change)
- Part II.A: precured tread pattern
 - Applicant: the tread supplier
 - test report (as today) + certificate for the supplier
 - COP to be done by the supplier
- Part II.B: moulded cure pattern
 - Applicant: retreader (and not only a plant as for part I)
 - test report (as today) + certificate for the retreader
 - COP to be done by the retreader

Thank you!
