

Work on gender statistics under the Conference of European Statisticians

Andres Vikat

UNECE Statistical Division

UNECE Group of Experts on Gender Statistics

28-29 September 2021

Accomplished in 2021

- Guidance on measuring the impact of the Covid-19 pandemic on women and men
 - Countries to review and test the proposed indicators and survey questions, and incorporate them into regular statistical data collection
- Online networking platform on measuring gender identity
 - Periodic updates of the collected material through national focal points

Meetings of the Group of Experts

- Meeting with physical presence planned for the 1st half of 2023
- Possible online meeting in 2022

Areas for potential future work

identified by the CES Steering Group on Gender Statistics

- **Climate and gender**

- Access to land and natural resources

- Environmental management

- Vulnerability to environmental challenges

- Sustainable modes of travel

- Climate-friendly choices and attitudes

- Frameworks not yet emerging for measuring these issues in the context of developed countries

- **Administrative sources and big data for gender statistics**

- Sharing experiences of use for gender statistics

- Meeting the quality standards of official statistics

- Cooperation with other government and non-governmental entities

- **Cultural participation of women and men**

- Impact of the pandemic on the female-dominated occupations in arts and culture

- Limited access to ICT for some women, making it more difficult to participate in online events
