

14 September 2021

Online meeting of the Group of Experts on Gender Statistics, 28–29 September 2021

ABSTRACT

Title	Improving gender statistics in Switzerland: on the way to open government data
Author Name	Katja Branger
Author Organization	Federal Statistical Office Switzerland
Session	Communicating Gender Statistics

The Covid-19 crisis showed the importance of quality data and statistics that are accurate, reliable and timely. How can data producers meet the needs of data users? Through digitalization and innovation? NSO Switzerland started a dialogue between users and producers based on the 2030 strategy of gender equality and the strategy for open government data. The presentation will be a very fresh experience report.
