

Statistical Committee of the Republic of Armenia

# **MIGRATION BASED ON THE RESULTS OF COMBINED POPULATION CENSUS OF THE REPUBLIC OF ARMENIA**

UNECE Online Meetings on Migration Statistics,  
26-28 October 2021

# POPULATION CENSUS METHOD FOR THE 2020 ROUND

For 2020 census round (2015-2024) Armenia is moving from traditional census method towards the register-based and combined census.

- \* 100 % register – based census
- \* 25 % sampled census with hand-held devices

In order to update the data of the state population register in the context of the census, at the level of personal identification, they will be combined with the Border management Information System. The data on the other variables defined by the census program will be obtained by sampling 25% of the address data from the State Population Register, through interviews with the selected population by the enumerators, using tablets.

# THE DATA AVAILABLE FROM THE STATE POPULATION REGISTER

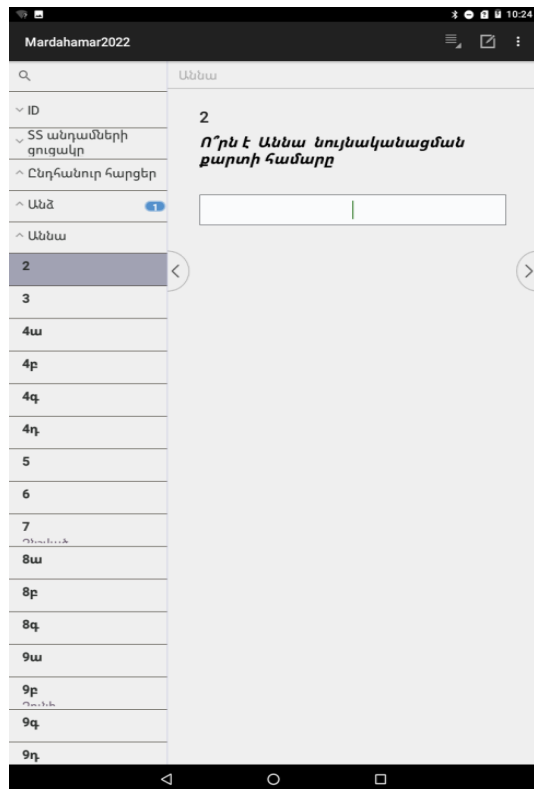

- personal code;
- name, surname and patronymic, if certified documents are presented;
- status (residence status or refugee status);
- actual registration address;
- citizenship;
- birthday, month, year, and birth place.
- sex.

# INFORMATION FROM THE QUESTIONNAIRE TO MEASURE MIGRATION FROM THE 25% SURVEYED POPULATION

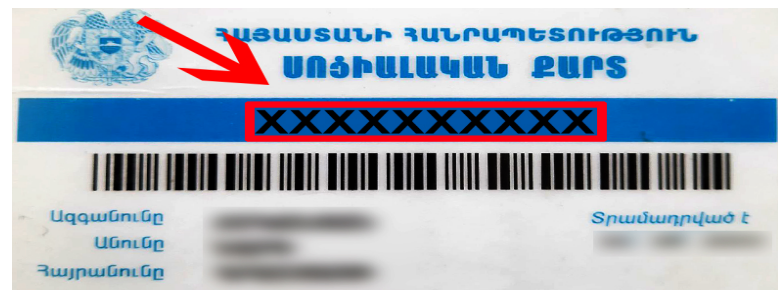

## Public service number

Every citizen of the Republic of Armenia is provided with a PSN (Public Service Number).

In case of having an identification card, the person's PSN is indicated on the card, and in case of not having it, it is available on the Social Card
