

The Benefits and Challenges of Resource Classification

David MacDonald
Expert Group on Resource Management

The Challenge of Classification

- How to Classify?
- By genre
- By artist
- By composer
- By instruments
- By tempo
- By date recorded
- By date purchased

Resource Classification Stakeholders

UNECE

Governments

management of national resources

Creators of energy & mineral studies

to facilitate formulation of consistent and far-sighted policies

Industry

to provide data and information necessary to deploy technology, management and finance to serve host countries, shareholders and stakeholders

Financial community

to provide information necessary to allocate capital appropriately so reducing costs

UNFC and UNRMS

Consistent classification and management of all resources

UNECE

Minerals

Petroleum

Renewables

Uranium

Injection

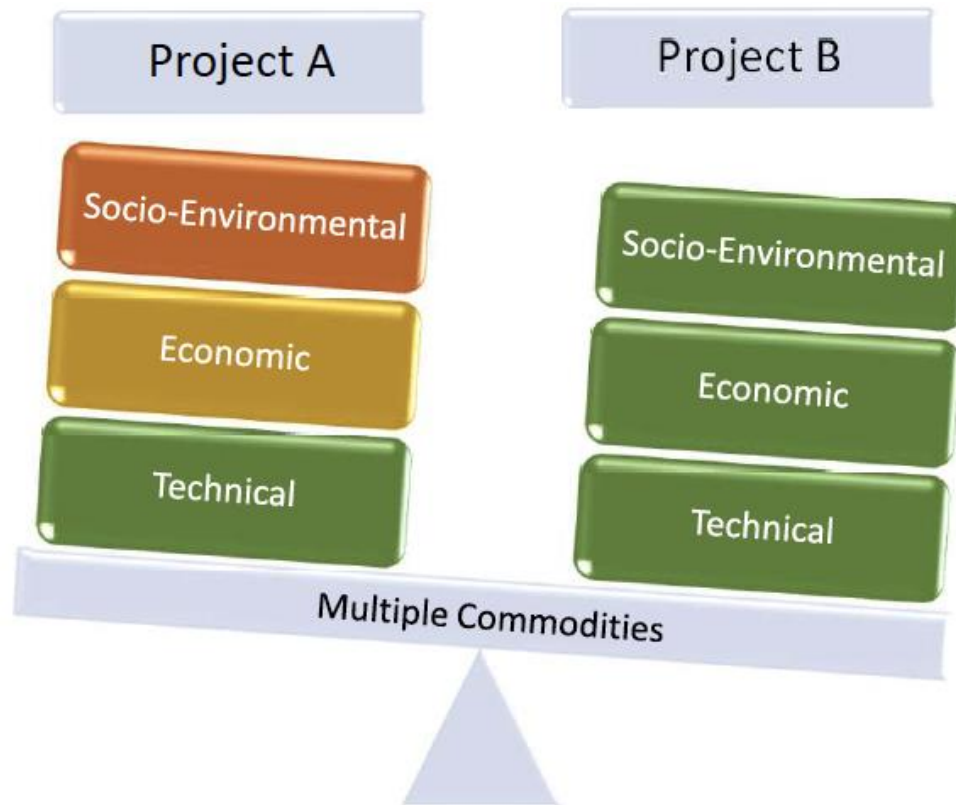

Anthropogenic

The Benefits of the UNFC & UNRMS

UNECE

- Principles-based, generic systems applicable for multiple commodities (renewable energy, anthropogenic resources, gas storage, fossil fuels, raw materials, water)
- Meet the needs of various stakeholders (government management, business development, financial investing, commodity planning)
- Allows consistent comparison within and across multiple commodities
- Globally deployed and endorsed by the UN ECOSOC for application
