

## Round table

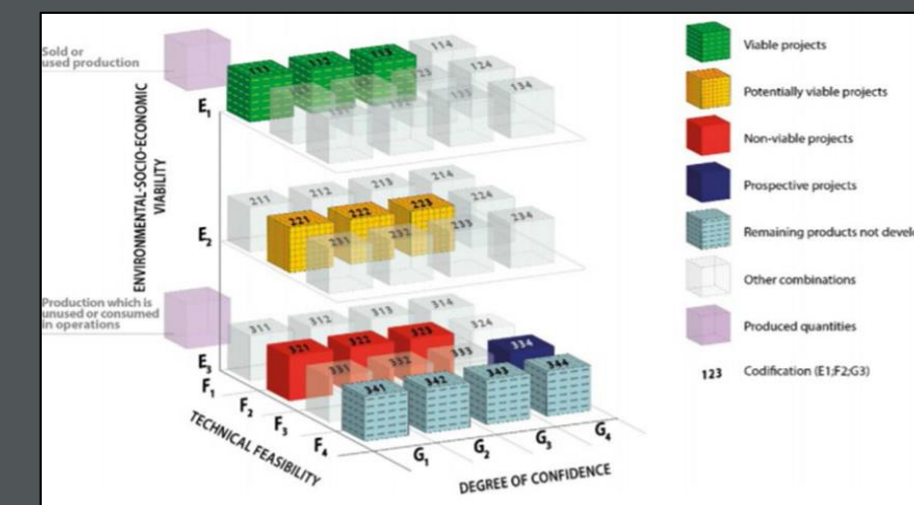

# Development of the United Nations Resource Management System (UNRMS) for expansion of the investment potential of Central Asian and BRICS countries: Main goals and principles

UNECE

Tyumen Oil & Gas Forum: September 16, 2021

Tyumen, Russia

Prospects for implementing the UNFC and UNRMS to improve the state management efficiency of the mining and geological sector of Kazakhstan's economy.

Georgiy Freiman

Cheirman EC of PONEN,  
General manager  
«GeoMineProject» LLP

The Reform of the Kazakhstan's mineral and raw material complex has been started in July 2018 with the introduction of the new Code "On Subsoil and Subsoil Use"

On the readiness of Kazakhstan to increase the development of the country's mineral and raw material complex

## The Code "On Subsoil and Subsoil Use"

liberalized subsoil use procedures and consolidated the transition to **CRIRSCO** standards for Solid minerals

### radically simplified licensing procedures

the principle of the first application "first come - first received" was introduced, the terms were significantly reduced

greatly facilitated access to historical geological information

the interactive map of subsoil use, available online, was introduced

## The Code of the Republic of Kazakhstan

on Subsoil and Subsoil Use

dated 27 December 2017

No. 125-VI ZRK

(abridged version for mining companies)

## Positive legislative changes:

from 1996 to 2018

**551**

Subsoil Use Contracts  
for Solid minerals signed

from  
2018 r

Issued from above

**2,000**

new licenses for Solid  
minerals, mainly for  
prospecting and  
exploration work

- **A large part of new licenses have been issued to junior companies for «green field» prospecting and exploration.**
- **Thus, the fact that the investment attractiveness of subsoil use in the Republic of Kazakhstan increased is obvious.**

**On the readiness of Kazakhstan to increase the development of the country's mineral and raw material complex**

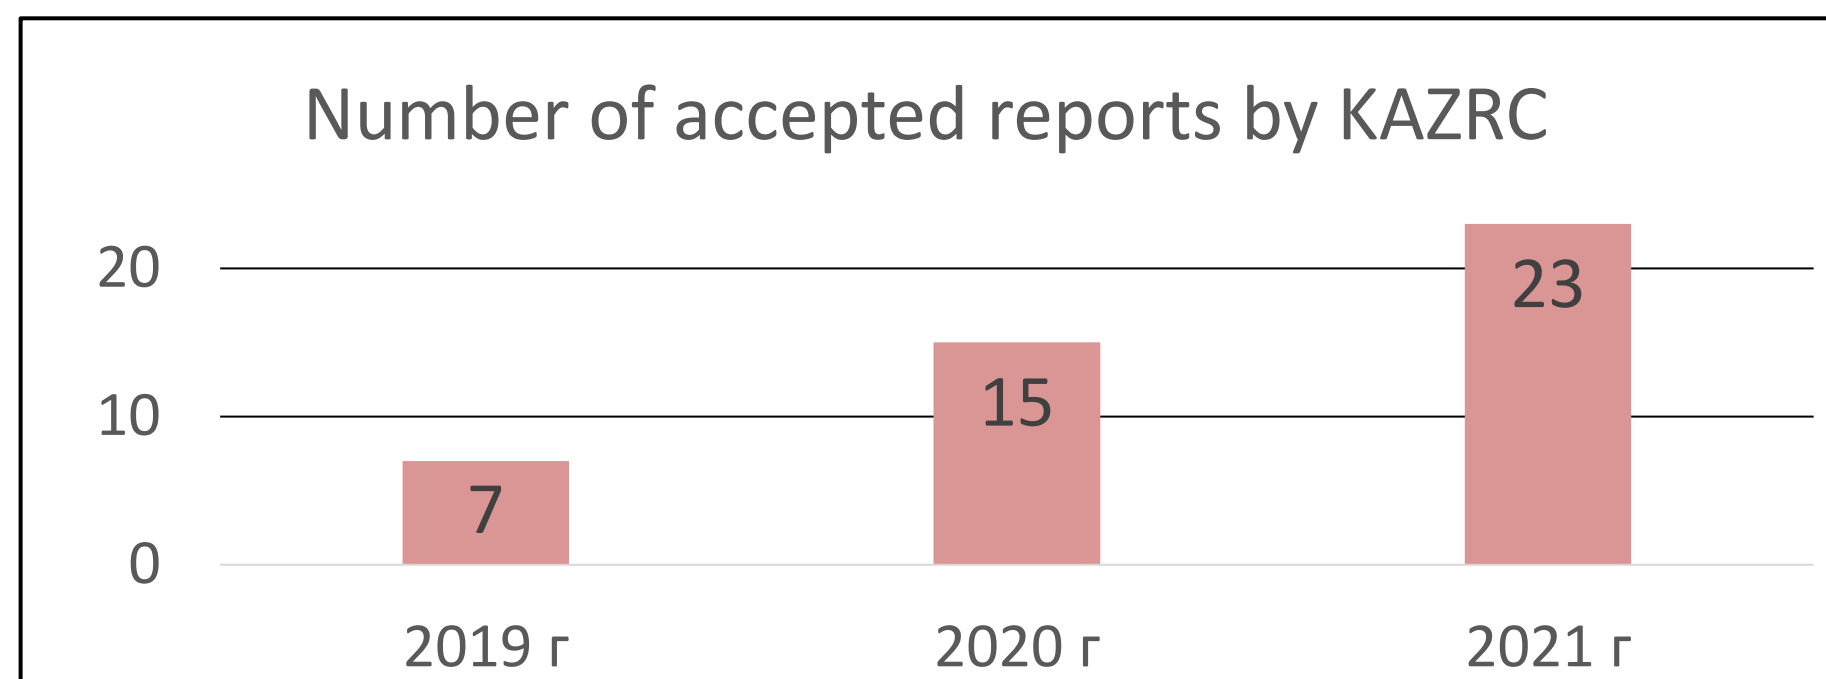

The Geology Committee accepts reports prepared by PONEN  
Competent Persons in accordance with

"The Kazakhstan Code of Public Reporting on  
the Results of Exploration, Mineral Resources  
and Mineral Reserves (KAZRC)"

Resources and reserves estimated in accordance with the  
KAZRC Code were put on the State balance sheet,  
including several objects, for the first time

On the readiness of  
Kazakhstan to increase  
the development of the  
country's mineral and raw  
material complex

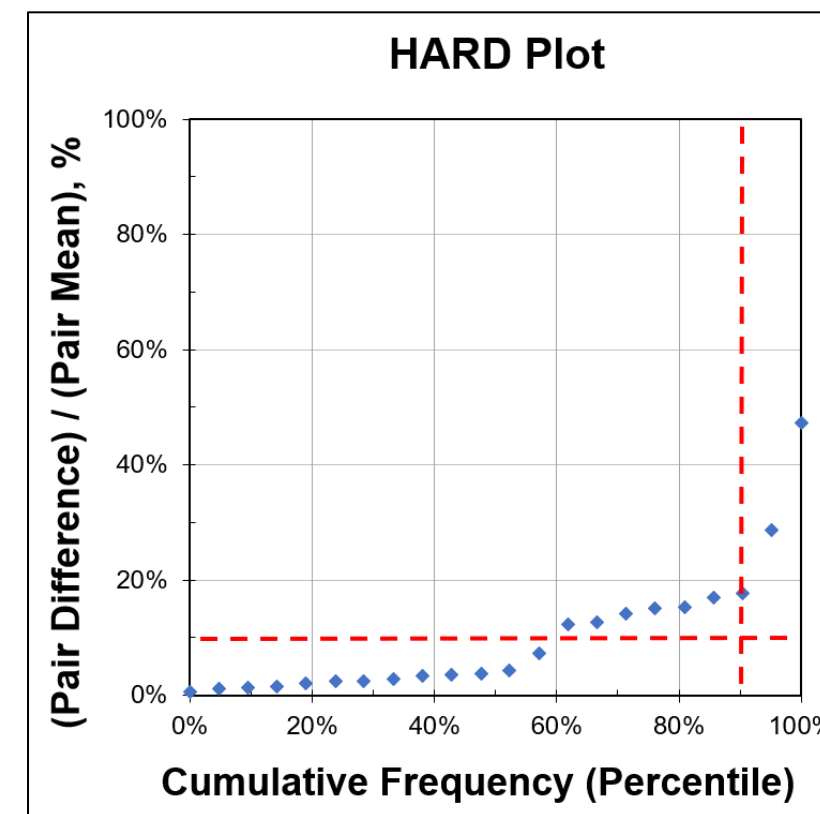

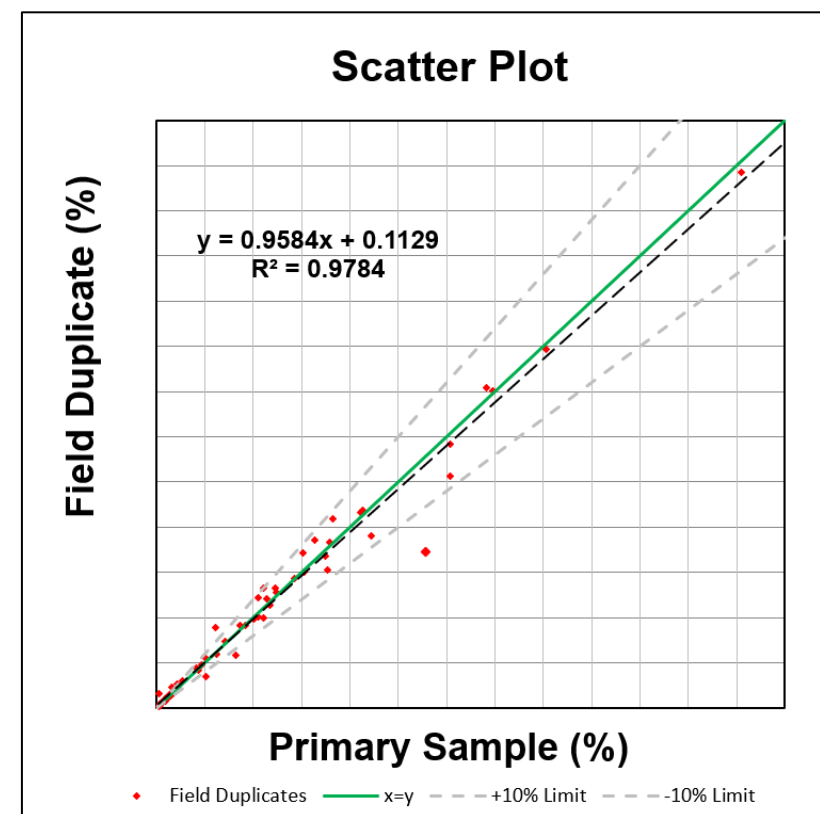

Due to the widespread use of CRIRSCO standards, the requirements for quality control and reliability of exploration work have significantly increased.

In exploration programs, all subsoil users, without exception, provide for standard QA / QC procedures

On the readiness of Kazakhstan to increase the development of the country's mineral and raw material complex

The mining and geological industry of Kazakhstan demonstrates positive changes, in connection with which favorable conditions have developed for moving in this direction and further:

On the readiness of Kazakhstan to increase the development of the country's mineral and raw material complex

**start implementation of UNFC and UNRMS**  
to create conditions for a significant improvement in the management of the development of the Mineral and Raw Materials Complex of Kazakhstan

**On September 1, 2021, in his annual Address, the President of Kazakhstan Kassym Zhomart Tokayev announced the need to continue reforms in the mineral and raw materials sector of the economy, for which it follows:**

**create an effective  
National Geological Survey**

**Further action plan to improve management efficiency of the Kazakhstan's mineral and raw material complex**

**The PONEN Executive Committee, as part of the continuation of the industry reform and the creation of the National Geological Survey, proposes**

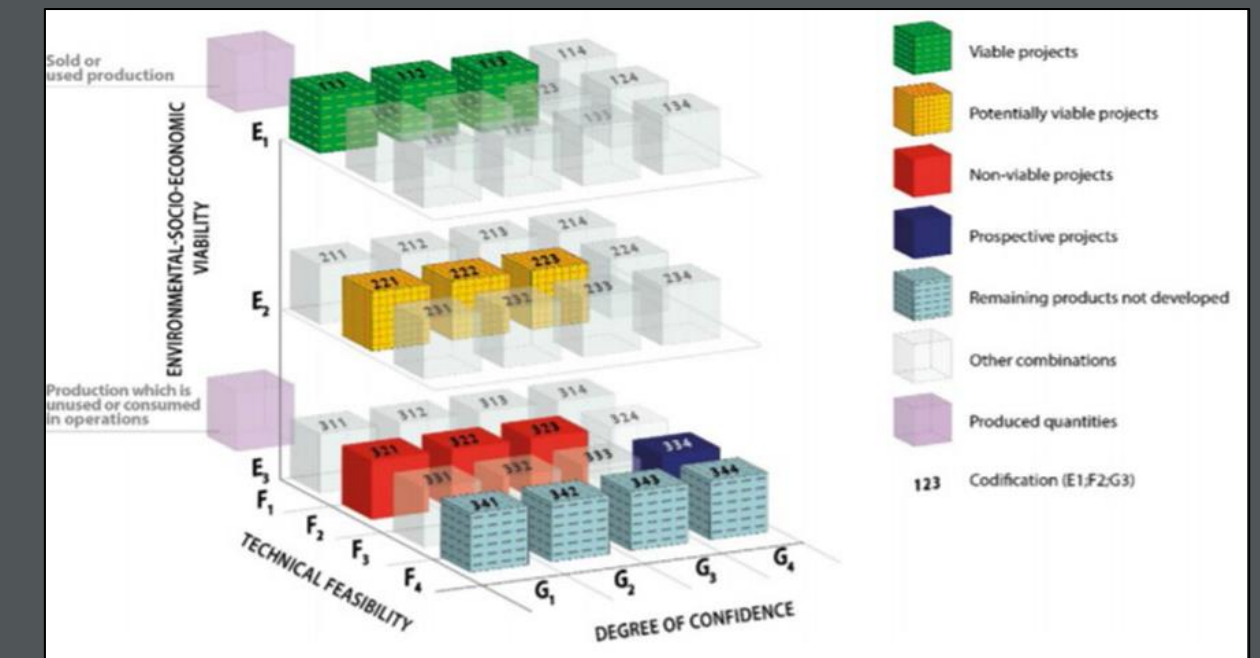

**at the first stage:**

- Associations KAZRC and PONEN, with the involvement of the Association of Mining and Metallurgical Enterprises (AGMP) and the Association of Industrial Geological Prospecting Organizations (APGO)

**Develop a Concept for the Application of the UNFC and UNRMS**

in the mining and geological industry of Kazakhstan

**Further action plan to improve management efficiency of the Kazakhstan's mineral and raw material complex**

*at the second step:*

**- organize a discussion of the Concept**

at the Geological Subcommittee of the National Chamber of Entrepreneurs Atameken,

**with the creation of a Working Group to develop a Roadmap and Implementation Program for the UNFC and UNRMS,**

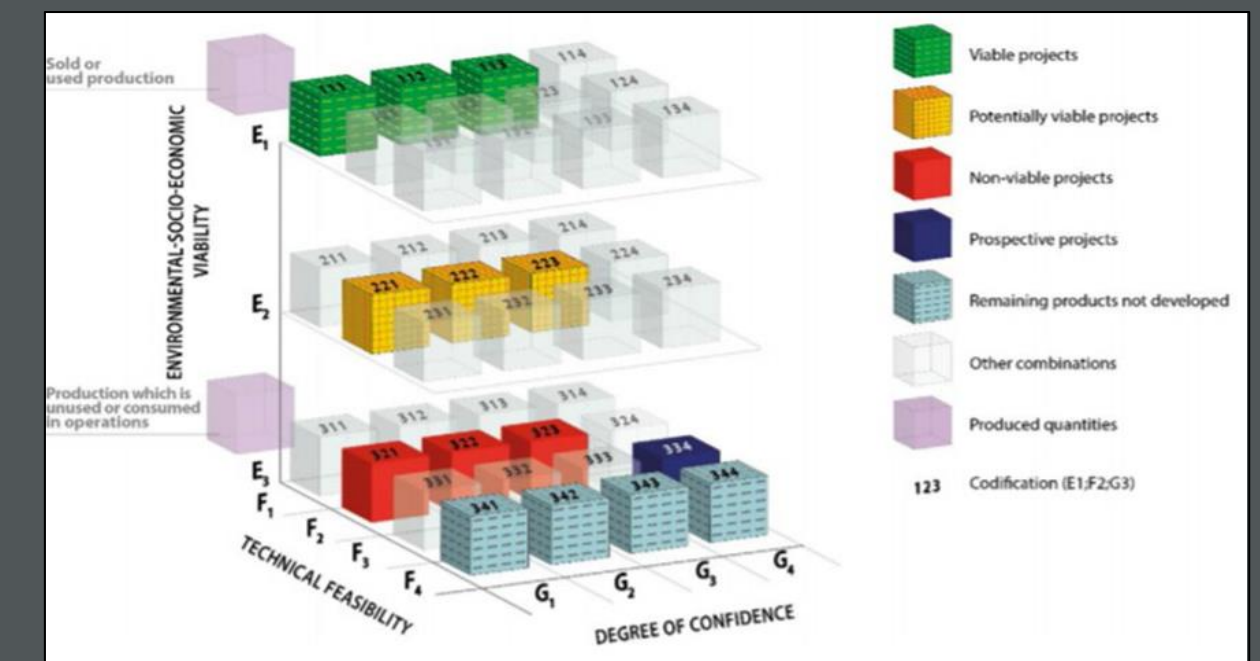

with the involvement of stakeholders

- contact the Working Group of the UNECE Sustainable Energy Division with a request for advice in the development of

**UNFC and UNRMS Phased Implementation Programs**

in the state management of the mining and geological industry of Kazakhstan.

Further action plan to improve management efficiency of the Kazakhstan's mineral and raw material complex

**Thank you for your attention**
