Progress in producing and using environmental statistics and indicators

Bosnia and Herzegovina

The Environmental Strategy and Action Plan of Bosnia and Herzegovina - BiH ESAP 2030+

The BiH ESAP 2030+ is a policy document that establishes the environmental policy goals and key activities up to 2032 in Bosnia and Herzegovina

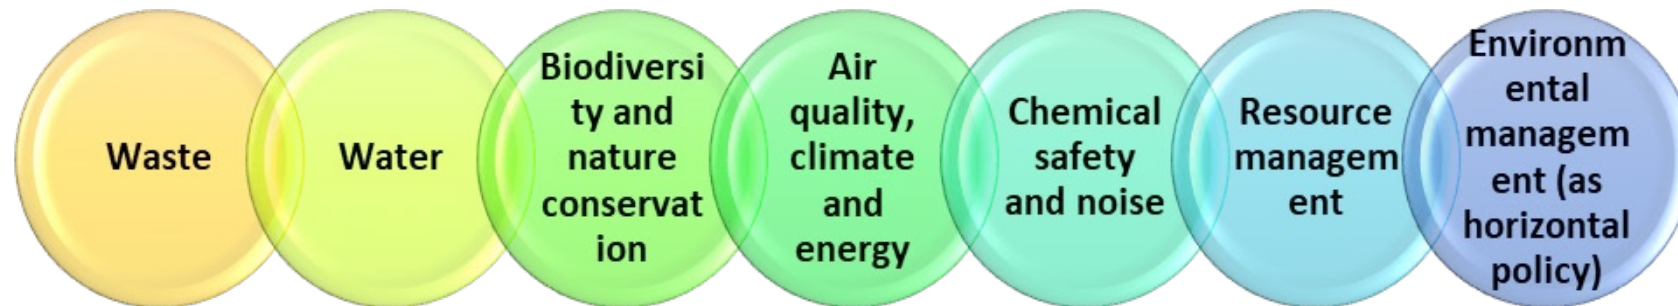

The project is expected to be completed in April 2022 with key accomplishments:

- provide BiH environmental authorities with strategic goals, thematic objectives and feasible actions that are clearly defined, agreed and adopted
- help to align BiH's legal and institutional frameworks with the European Union environmental policies and procedures
- identify priorities for domestic financial allocations as well as assist BiH in accessing international financing
- raise the awareness around environmental issues among the general public and the business sector in BiH.

7 environmental areas in BiH ESAP 2030+

The content of BiH ESAP 2030+ will cover seven important EU environmental policy areas:

- ☐ Water
- ☐ Waste
- ☐ Biodiversity and nature conservation
- ☐ Air quality, climate and energy
- ☐ Chemical safety and noise
- ☐ Resource management
- ☐ Environmental management (as horizontal policy)

BiH ESAP 2030+ Action Plan – WG1- Waste

- Example

Expected outcome	Measures	Type of measure	Outcome
2.3. Remove obstacles by 2025 and establish an efficient system of monitoring and reporting according to the regulations of the European Union and other international institutions in the field of waste management	2.3.1.5 Establish a functional system of information and data transmission for the purpose of mandatory reporting for certain directives, preparation of the State of the Environment Report in BH and sectoral Reports	Institutional measure	Active participation in the international activities such as EEA, WGEMA, JTFEI, UNECE, 3 Rio Conventions, Sendai Framework, IEA.
	2.3.1.6 Provide quality and harmonized official statistics to all users, which will enable the formulation, monitoring and evaluation of policy measures	Institutional measure	Capacities for development of environmental statistics and statistics for environmental indicators and sustainable development have been established (UN SDG, EEA Eionet, Eurostat, OECD, UNSD, UNECE / UNEP)

Environment

- *Monetary environmental accounts*

State of play: BHAS regularly collects data Environmental protection expenditure (EPE) data.

Plan: In the BHAS Statistical Plan 2022, the production of EPEA (Environmental Protection Expenditure Accounts) is planned, according to common framework for the collection, compilation, transmission and evaluation of European environmental economic accounts.

- *Physical environmental accounts*

State of play: BHAS regularly collects data on material flow (domestic extraction of raw materials, import and export of raw materials, domestic output...).

Plan: BHAS regularly transmits data set Economy-wide material flow accounts (EW-MFA) to Eurostat, the plan is to increase data quality in accordance with the requirements of Regulation (EU) no. 691/2011.

- *Statistics on waste*

State of play: BHAS regularly transmits to Eurostat municipal waste data set WASTE_MUNWDAT_A. Also, BHAS reports to Eurostat with Waste Quality Report (WASTE_ESQRS_A) and WASTE_GEN_2 for waste from production activities.

Plan: Transmit waste data to Eurostat which is carried out in a two-year dynamic, in accordance with the EU Regulations on Waste statistics.

- *Water statistics*

State of play: BHAS regularly collects data on water statistics.

Plan: In order to improve the reporting of the JQ Inland water Questionnaire, a new survey is planned in the BHAS Statistical Survey Plan 2022 "Research of wastewater treatment plants" and "Research on protection against the harmful effects of water".

Sustainable development indicators

➤ *2020 indicators: production and dissemination*

State of play: *To measure the impact of the SEE 2020 strategy, a set of 11 main indicators and 51 accompanying indicators has been established to monitor key development studies of the SEE 2020 Strategy. BHAS regularly collects data and reports to the RCC (The **Regional Cooperation Council** serves regional cooperation and Euro-Atlantic integration of South East Europe).*

Plan: *Eurostat supported this process through the IPA 2015 MBP Pilot Project No. 7.3 - South East Europe 2020 Indicators. One of the results of the project is the production of an e-publication "SEE 2020 Indicators, Bosnia and Herzegovina,, (<https://see2020.info/about/>).*

➤ *SDG indicators: production and dissemination*

State of play: *The BiH Portal for Sustainable Development Goals provides users with continuously updated data on the status of the UN SDG indicator for Bosnia and Herzegovina and detailed methodological information. <https://sdg.bhas.gov.ba>*

Plan: *The portal is regularly maintained by the Agency for Statistics of Bosnia and Herzegovina.*
