

ACTION PLAN FOR THE IMPLEMENTATION OF THE CLIMATE CHANGE ADAPTATION STRATEGY OF THE SLOVAK REPUBLIC

GOAL

improve preparedness and strengthen resilience to negative impacts resulting from climate change

- 2018:** Analysis and identification of tasks and priorities
- 2019-2021:** Participatory process with > 200 participants on definition of priorities, followed by SEA and approval processes
- 2021-2027:** Implementation (Short term objectives 2021-2023) (Mid-term objectives: 2024-2027)

ACTION PLAN FOR THE IMPLEMENTATION OF THE CLIMATE CHANGE ADAPTATION STRATEGY OF THE SLOVAK REPUBLIC

KEY CHALLENGES

- Balancing interests of authorities and municipalities at national and local levels
- Lack of integrated approach to land management + lack of capacities at local level
- Social and economic issues – energy poverty and impact on vulnerable members of society --> social and just adaptation

NEXT STEPS

- Regular monitoring and evaluation
- Level of participation as one of the key indicators

KEY LESSONS LEARNED

- The need to coordinate strategic documents and initiatives
- The need to coordinate at the national and local level
