Transport & Logistics Domain

IMO eFAL Project

Sue Probert presenting for
Nico De Cauwer
UN/CEFACT Expert & Project Leader
IPCSA Chair Subdomain Standards & Technology
IMO eFAL Project Status

• Timeline of the project has expanded due to the extension of the IMO Data Reference Model with Ship Reporting- & Certificates-data elements
  • Mapping of these (new) data sets will be planned within MMT
  • (open) Discussion needed how to cope with the UN/CEFACT-project timeline w.r.t. the continuing process within IMO Expert Group in extending the IMO Data Reference Model

• Specific session conducted on mapping for an MMT-subset w.r.t. the Maritime Declaration of Health (MDH)
  • Goal = to build specifications + MIG for a new ‘MDH-message’ (syntax outputs: XML and JSON API?)
IMO Expert Group on Data Harmonisation (EGDH)

• Since July 2019, the IMO Expert Group on Data Harmonization (EGDH) is responsible for the technical maintenance of the IMO Compendium and for further expanding its data set and data model to areas beyond the FAL Convention, including exchange of logistics and operational port and shipping data.

• For the 3 Partnership Agreement Signatories UNECE, ISO and WCO supporting the EGDH work means attending 6 week long F2F or online calls plus 6-10 additional data modelling days

• Question – Should UNECE/CEFACT continue to support all data set extensions of the IMO Compendium Reference Model to be mapped under MMT?

• Question – we have 4 experts to date but would any additional T&L experts be willing to join the EGDH work to support the UNECE/CEFACT delegation?
MMT RDM subset covering:

- 1-7 IMO FAL Forms
- Security Declaration
- Waste Declaration
- Maritime Declaration of Health (MDH)
- Stowaways
- Ship Certificates

plus future:

- Ship Reporting
- Maritime Services
- more?
