Circular Economy
ACCELERATING THE TRANSITION TOWARDS CIRCULARITY IN THE UNECE REGION

About the project

The transition to a circular economy is a complex, cross-cutting challenge requiring policy interventions and coordination across many portfolios.

UNECE leads a multi-agency capacity-building project to support selected UNECE member States in the circular economy transition.

The project is managed by the Economic Cooperation and Trade Division, will run for four years (2021 to 2024), and is funded by the UN Development Account.

Key target areas

The project will address challenges and harness opportunities in key target areas:

- Traceability of products along international value chains
- Innovation-enhancing public procurement
- Management of waste, including food loss and infrastructure

Our main actions

1. Creating a multi-stakeholder knowledge sharing network to develop and disseminate evidence-based good policy practices

2. Conducting gap analyses, assessing lessons learned, and developing policy briefs for discussion at national and regional events

Let us make the future more circular!
