

Methane Mondays Interviews

Questions

- What is your name and affiliation?
- Please briefly describe the profile of your institution. What does it do and why is methane an important matter for it?
- For you is methane more of an energy resource or more of a climate pollutant?
- Which coal mine methane emissions mitigation solutions do you find the most attractive and why? Do you have other ideas related to use or abatement that you believe should be investigated?
- What incentives would you suggest to encourage methane emitters to pursue mitigation?
- Would you like to see the issue of methane emissions regulated at the supranational level?
If yes:
 - What should be the focus of such regulation?
 - What solutions would you like it to propose?
- How do you see the future in the context of methane emissions? What do you think will happen (business as usual, new regulations, coal phase out and the end of the coal industry...), and what would you like to happen?
