Sustainable FDI Indicators

Heather Taylor-Strauss
Economic Affairs Officer
Investment, Enterprise and Development Section
Trade, Investment and Innovation Division
UN ESCAP
taylor21@un.org
1. FDI Indicators

Existing Indicators

- Kline (2012)
- Sauvant and Mann (2017)
- OECD FDI Qualities

UN ESCAP Indicators

- Tool to quantify sustainable development impacts of FDI projects
- Two sets of indicator templates: General and Sector Specific
2. General indicators: example

<table>
<thead>
<tr>
<th>Clusters</th>
<th>Indicators</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECONOMIC</td>
<td>Job Creation</td>
<td>Number of jobs created</td>
</tr>
<tr>
<td></td>
<td>Capital Investment</td>
<td>FDI inflows minus capital and profit</td>
</tr>
<tr>
<td></td>
<td>Technology Transfers</td>
<td>Transfer mechanisms include in-house training for local employees; workshops or mentoring programs open to suppliers or other local businesses; sharing production specifications and quality control methodology with local suppliers; licensing patented products or processes to local companies; and loan or lease of equipment.</td>
</tr>
<tr>
<td>ENVIRONMENTAL</td>
<td>Resource Management</td>
<td>Presence of a conservation, protection, or recycling technique within an FDI project for the project site</td>
</tr>
<tr>
<td></td>
<td>Pollution Controls</td>
<td>Commitments for pollution controls like the one existed in its home country as well as industry “best practices”.</td>
</tr>
<tr>
<td></td>
<td>CO2 Emissions</td>
<td>Comparing the generated CO2 emissions per unit of output to the host country level in the IEA database</td>
</tr>
<tr>
<td>SOCIAL</td>
<td>Skills Enhancement</td>
<td>Number of workers trained, and type of training being offered by MNEs under a skills enhancement programme</td>
</tr>
<tr>
<td></td>
<td>Labor Rights</td>
<td>MNE’s commitments to key labor rights including freedom of association, collective bargaining, non-discrimination, and workplace safety</td>
</tr>
<tr>
<td>GOVERNANCE</td>
<td>Responsible Business Conduct</td>
<td>Adoption of International Standards of Responsible Business Conduct</td>
</tr>
<tr>
<td></td>
<td>Transparency</td>
<td>External transparency through monitoring, auditing or personnel systems facilitates beneficial access to information regarding corporate policies and operations</td>
</tr>
</tbody>
</table>
2. General Indicators

Scoring Strategy

• Raw data available to measure each indicator is different
• To make each indicator comparable, i.e. normalized, a multiple binary scoring strategy was used
  • Indicators are given scores of 0, 1, or 2 depending on a threshold value.

Threshold Strategy: How to assign it?

Example:
Social dimension - healthcare
MNE provides ‘adequate’ medical support to workers
Investment is then scored in the following way:
  No healthcare coverage = 0
  Healthcare coverage < 80%, score = 1
  Health care coverage provided > 80%, score = 2
3. Sector based indicators

**Why?**

- Each country has different SDG sector priorities
- Example: mining and oil sectors and environmental considerations
- Additional sector based indicators can adjust weights based on importance to sector

**How?**

2 ways:

1. Those mentioned in the country’s National Development Strategy
2. Consultations/surveys with ministries involved in national planning

*stakeholder consultations also important*
4. Sector based indicators: Agricultural Sector

- Investment can: create employment, bring expertise, financing capacities and marketing networks
- But it can also have adverse social and environmental impacts
- Sector indicators aim to ensure that the investment in is sustainable and responsible.

Agriculture sector specific indicators are:

1. Land Productivity
2. Water Usage
3. Management of Pesticides

For each of these indicators, threshold values can be decided, and they can be placed into one of the four clusters.

Ex: Water usage belongs in the environmental cluster
5. Obstacles

- Sustainable development policy
- Data availability
- Monitoring, reporting, accountability
- Political support
6. Conclusion

- Full template for the indicators, including those for other sectors, can be found [here](#).
- Next steps:
  - Currently working with Bhutan, Mongolia and Papua New Guinea to develop country and sector specific indicators for investments in essential oils, mining, and tourism.
  - E-learning course.
  - National capacity building with IPAs across ESCAP member States.
- Final thought: Deciding whether the investment is sustainable enough or not, is something that the host countries must judge for themselves - what is the threshold of the total score below which they will not allow investment in the country.
