

# Promotion of the framework

Meeting of the Group of Experts on Quality of Employment,  
18th November 2021

Session 4: Progress of the Steering Group on Measuring Quality of  
Employment

# History

Expert Group Meeting Nov 2019:

From the report of the meeting:

“42. The meeting participants agreed that: ...

... g) Ways in which to further promote the statistical framework for MQE, including having **more indicators published** under the headline of QE should be discussed and **a website created for collecting examples** on this.  
“

# Progress

- Presentation of the draft at the Steering Group Meeting in Nov 2020
- Discussion and mandate to extend the website

“The Steering Group welcomed the design and the structure of the website and the discussant’s proposals. The primary target group of the website are NSOs, but it will be accessible to all. The content must be easy to maintain. Katharina will take all proposals into account and prepare an updated version for the next steering group meeting. A final version should be presented to the 2021 expert group meeting for endorsement before making it publicly available.”
