Steering Committee on Trade Capacity and Standards

Working Party on Agricultural Quality Standards**Seventy-sixth session**

Geneva, 15—17 November 2021

Item 11 of the provisional agenda

Programme of work of the Working Party 2022**Programme of work of the Working Party on Agricultural Quality Standards 2022 *****Submitted by the secretariat***Summary*

This document contains the proposed programme of work of the Working Party on Agricultural Quality Standards and its Specialized Sections (on Standardization of Meat; Fresh Fruit and Vegetables; Dry and Dried Produce; and Seed Potatoes) for 2022. It is based on the Programme of work of the trade sub-programme for 2022 (ECE/CTCS/2021/7) that was endorsed during the sixth session of the Steering Committee on Trade Capacity and Standards on 21–22 June 2021 and following a silence procedure.

The Working Party is invited to review and discuss and adopt its 2022 programme of work.

Delegations are invited to send their comments to the ECE Secretariat in advance.

Proposed decision:

“The Working Party adopts the Programme of work of the Working Party on Agricultural Quality Standards for 2022.”

This document is submitted according to ECE/CTCS/2019/10 section IV, ECE/CTCS/2019/2 decision 2019-8.6, and A/75/6 (Sect.20) and supplementary information.

I. Introduction

1. The Working Party on Agricultural Quality Standards (hereinafter referred to as the Working Party), established by the Geneva Protocol/Understanding (1958. Rev. 1965, 1985 and 2015)- acting within the framework of the mandates and policies of the United Nations and the United Nations Economic Commission for Europe (ECE), and under the overall guidance of the ECE Steering Committee on Trade Capacity and Standards, is entrusted with the implementation of the work under the ECE Trade Sub-programme covering “covering agricultural quality standards taking into account sustainable production trade and consumption patterns”. The work complements and is carried out in partnership with work undertaken by other international bodies.

2. The aim of its work is to foster:

- (a) Market transparency - define a common trading language, with minimum

quality requirements for agricultural produce that facilitate fair and sustainable trade, prevent technical barriers to trade and contribute to economic growth (SDG 8).

(b) Food security - promote the sustainable production and consumption of quality agricultural produce, including the prevention of food loss and waste (SDG 2, SDG 12); and

(c) Collaboration - undertake capacity-building and awareness-raising activities in cooperation with other public and private sector international bodies (in support of the previous two activities) (SDG 17).

3. The Working Party operates under the ECE Rules of Procedure and the Guidelines on procedures and practices for ECE bodies, as agreed in Commission Decision A(65).

4. The Working Party is open for participation by all United Nations Member States in compliance with the accreditation process contained in the guidelines on procedures and practices for ECE bodies (E/2013/37-E/ECE/1464).

5. In addition, representatives from relevant international organizations non-governmental organizations, and the private sector, can also be invited as observers, in compliance with the United Nations rules and practices in this respect.

6. The Working Party defines its working procedures and those of its Specialized Sections.

7. The Working Party shall:

(a) Develop internationally agreed commercial quality standards for agricultural produce taking into consideration national standards and industry and trade practices for fresh fruit and vegetables (including early and ware potatoes); dry and dried produce; seed potatoes; meat; and eggs. The Working Party may develop standards, on request from countries, for other agricultural products, subject to the availability of resources;

(b) Revise and amend existing standards to reflect changing production, trading and marketing conditions, taking SDG targets into consideration;

(c) Undertake activities to harmonize the international application of its standards by developing and disseminating interpretative and guidance material;

(d) Collect, communicate, and analyse, when necessary, production, trade and inspection practices and other areas relevant to sustainable development, implementation and promotion of its standards and guidance material and other areas relevant to sustainable development;

(e) Undertake training activities targeted at the public and private sectors to support sustainable development of production and trade;

(f) Promote uniform quality-control procedures and the use of the model quality conformity certificate through the Specialized Sections and in cooperation with governmental, inter-governmental and other organizations and especially the Organisation for Economic Co-operation and Development Scheme for the Application of International Standards for Fruit and Vegetables implementing standards to achieve uniformity of inspection methods and comparability of results;

(g) Cooperate with other international organizations and standard-setting bodies, such as the relevant Codex Alimentarius Commission committees and the Organisation for Economic Co-operation and Development Scheme for the Application of International Standards for Fruit and Vegetables, to avoid duplication of work, divergence in standard requirements and interpretation. Ensure that the standard-setting process is consistent with relevant international rules.

(h) Facilitate communication between private and public stakeholder organizations with an interest in the standards to provide a basis for transparent, fair and sustainable trade.

II. Draft programme of work for Working Party 7 for 2022

(a) **Market transparency: define a common trading language, with minimum quality requirements for agricultural produce that facilitate fair and sustainable trade, preventing technical barriers to trade and contribute to economic growth**

8. During 2022, the Working Party will provide guidance on the priorities for future work identified by the Specialized Sections and potential synergies whenever possible, additional areas of work. The Working Party shall review and adopt proposed new and revised agricultural quality standards arising from the specialized sections and associated guidance material/literature, thus ensuring ECE agricultural quality standards remain relevant, continue to facilitate trade while simultaneously supporting the achievement of the SDGs - including Goal 2.

(b) **Food security and sustainability: promote sustainable production and consumption of quality agricultural produce, including the prevention of food loss and waste**

9. The Working Party has aligned its work with the SDGs and where possible focus on improving sustainable production and trade particularly through its focus on the prevention of food loss/waste and related areas of work in cooperation with other international organizations, the private sector and civil society. This has resulted in the organization of international conferences on cross-cutting themes involving all four Specialized Sections and the promotion of traceability of agricultural produce, food loss prevention, sustainable food production and standards at fora at national and international levels. This work directly supports SDG Target 12.3 on halving food loss by 2030.

10. In 2022, the Working Party will continue its work related to the implementation of Goal 12 and its Target 12.3 on halving food loss by 2030 and related Goals. In particular, the Working Party will work:

- with its Specialized Sections on intensifying efforts to review and compile practical measures and tools to help agricultural supply chains participants in products covered by the Specialized Sections to prevent and avoid food waste and food loss in rural and urban areas;
- in cooperation with its Specialized Sections encourage the development of new tools and guidelines and to organize international conferences/workshops to promote the implementation and use of standards by both the private and public sectors.

Note: Additional emerging topics under section (b) in line with the Working Party's mandate may be introduced and/or defined by delegations during in-session discussions.

(c) **Collaboration: undertake capacity building and awareness-raising activities in cooperation with other public and private sector international bodies (in support of the previous two activities)**

11. In 2022, if possible, the Working Party will undertake at least 6 days of capacity-building activities in collaboration with its Specialized Sections. The Specialized Sections will do so in cooperation with relevant ECE partners, other international organizations, the private sector and civil society to work towards the UN SDGs [change references to SDGs in general throughout document], foster linkages such as the internal ECE nexus approaches and achieve greater synergies, coherence and impact for the implementation of Agenda 2030.

III. Deliverables to be implemented in 2022

12. The mandates of the Working Party on Agricultural Quality Standards and its subgroups provide the legislative framework for its deliverables. The table below lists all deliverables, by category and subcategory, for the year 2022 that are expected to contribute to the attainment of the objective of the Working Party, as endorsed by the Steering Committee on Trade Capacity and Standards on 21–22 June 2021.

<i>Deliverables</i>	<i>2022</i>
	<i>planned</i>
Quantified deliverables	
A. Facilitation of the intergovernmental process and expert bodies	
Parliamentary documentation (number of documents)	
Documentation for the Working Party on Agricultural Quality Standards	60
Substantive services for meetings (number of three-hour meetings)	
6. Meetings of the Working Party on Agricultural Quality Standards and its specialized sections	26
B. Generation and transfer of knowledge	
Field and technical cooperation projects (number of projects)	
10. Project on food loss and agriculture	1
Seminars, workshops and training events (number of days)	
11. Seminars for standardization and inspection agencies and other stakeholders in transition economies and developing countries in the ECE region or beyond on ECE agricultural quality standards	6
Publications (number of publications)	
17. Publication on agricultural trade and supply chains	1
Technical materials (number of materials)	
20. Standards (new), explanatory brochures, posters and guidelines on agricultural quality	4
C. Substantive deliverables	
Consultation, advice and advocacy: Advisory services to Government officials and other stakeholders in ECE member States on trade facilitation and electronic business, agricultural quality standards, regulatory cooperation and standardization and regulatory and procedural barriers to trade	
D. Communication deliverables	
Outreach programmes, special events and information materials: Booklets, fact sheets, information brochures	
External and media relations: Annual set of press releases for the Unit	
Digital platforms and multimedia content: Update and maintenance of the website and databases of the sub-programme as well as of the portal on "Standards for the SDGs"	

IV. Additional resources being sought

13. If additional resources can be secured, the Working Party will:
- (a) respond to requests for capacity-building by member States;
 - (b) expand the work on food loss and waste and sustainable consumption and production, including circular economy as requested by the 69th Commission.
