

Case study for Road Map on Statistics for SDGs 2.0
Ireland: Story maps to illustrate unemployment and poverty

Description

To inform efforts in reporting Ireland's status in relation to achieving SDGs, Ireland's Central Statistics Office (CSO) used Story Maps to illustrate changes in relation to unemployment and poverty throughout the last decade. Data from the census, social welfare surveys and LFS are combined to show regions of poverty. Images, interactive maps, charts and text have been combined to highlight trends.
