Proposals for minor corrections to version 4.3

Corrigendum

1. **Paragraph 4**
   
   At the end of paragraph 4, add a bullet point
   
   • A new testable rule R017 applied on message I5 which would read as follows:
     “Customs authorities can only query TIR transport information related to a guarantee
     if they are part of the itinerary.”;

2. **Paragraph 6**
   
   After paragraph 5, insert a new paragraph reading
   
   5bis. The “Container transport indicator” used in class “Consignment” is not an actual
   indicator but rather a coded attribute linked to code list UN/EDIFACT 7365 (Processing
   indicator description code). Consequently, condition C005 need to be amended and test for
   value “69”, which means “Goods not carried in container” instead of “FALSE”. Conditions
   C005 should therefore read as follows:

   IF (CONSIGNMENT.Heavy or bulky goods indicator) = FALSE AND
   (CONSIGNMENT. Container transport indicator) = 69
   THEN NOT EMPTY (TRANSPORTEQUIPMENT.CERTIFICATEOFAPPROVAL)
   ELSE EMPTY (TRANSPORTEQUIPMENT.CERTIFICATEOFAPPROVAL)

3. **Annex I, Table 2, row C005**
   
   Replace row C005 with the row below

<table>
<thead>
<tr>
<th>Condition ID</th>
<th>Description</th>
<th>Pseudo code</th>
</tr>
</thead>
<tbody>
<tr>
<td>C005</td>
<td>If the consignment is marked as not containing heavy of bulky goods and the transport equipment is a trailer, a semitrailer, a double trailer or the load compartment of a simple truck, then the certificate of approval in the transport</td>
<td>IF(CONSIGNMENT.Heavy or bulky goods indicator) = FALSE AND (CONSIGNMENT. Container transport indicator) = 69 THEN NOT EMPTY (TRANSPORTEQUIPMENT.CERTIFICATEOFAPPROVAL) ELSE EMPTY (TRANSPORTEQUIPMENT.CERTIFICATEOFAPPROVAL)</td>
</tr>
</tbody>
</table>

(Modified)
### 4. Annex I, Table 3, row R016

After row R016 *add a new row reading*

<table>
<thead>
<tr>
<th>Rule ID</th>
<th>Description</th>
<th>Testable</th>
</tr>
</thead>
<tbody>
<tr>
<td>R017</td>
<td>Customs authorities can only query TIR transport information related to a guarantee if they are part of the itinerary.</td>
<td>Yes</td>
</tr>
</tbody>
</table>

*(Added)*

### 5. Annex II, Table 4, row 332

*Replace row 332 with the row below*

<table>
<thead>
<tr>
<th>Code</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>332</td>
<td>Guarantee type/Guarantee mismatch</td>
<td>The guarantee type parameter value and the guarantee reference parameter value do not match what is recorded in the database</td>
</tr>
</tbody>
</table>
