

# Towards developing national policy guiding principles and national strategies on forest landscape restoration

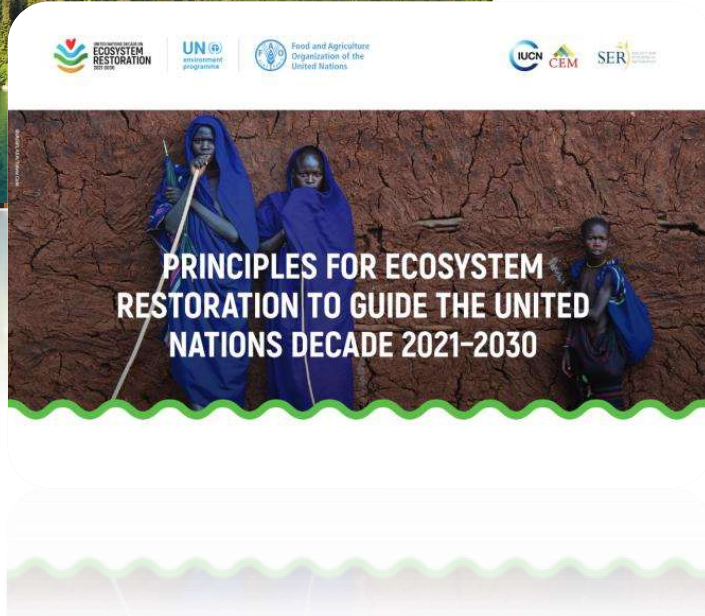

Rome, 22 November

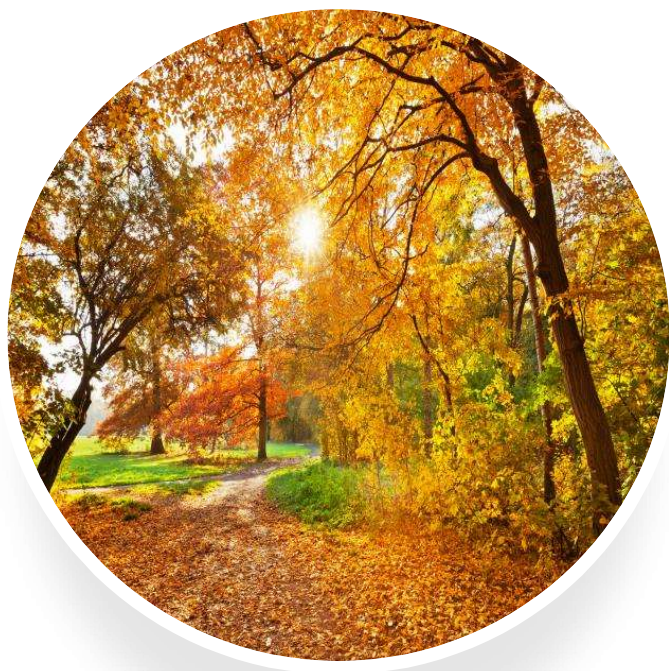

# Tools available to support FLR in CCA

## FAO Forest and Landscape Restoration Mechanism

# Plan for developing national policy guiding principles

## Way forward:

Support the development of **national policy guiding principles (NPGP)**

Develop national strategies tailored to the region

NPGP to provide an **enabling framework** for the implementation and monitoring of successful and sustainable FLR activities

# Plan for developing national policy guiding principles

## Process

Support 2 pilot countries to develop national strategies based on the NPGP

Prepare a draft NPGP in collaboration with countries

# Regional FLR policy dialogue to be held on Wednesday 9 February 2022

- Draft NPGP will be discussed and endorsed at a regional policy dialogue to take place on 9 February 2022
- Advancement of the 2 pilot national strategies and of a capacity building package will be presented
- Presentation of the [FAO FLR Mechanism](#) and opportunities for its support toward large scale FLR
- Discussion on further steps toward FLR implementation in the region

# Expected benefits

- NPGP will facilitate access to funding and will increase the visibility on a global scale of FLR efforts in the region
- NPGP will help to get a broader and sustainable stakeholders' support in FLR activities

# Capacity building approach

- Use and adaptation of existing capacity building contents from FAO and IUCN
- Develop a curriculum based on a coaching approach (regular backstopping sessions over one year)
- Initiate the capacity building process with a regional capacity building workshop – End of February 2022
- Follow-up coaching sessions with interested countries

# THANK YOU
