Paragraph 3.2.2.2., amend to read:

“3.2.2.2. Follow the test procedure defined in Annex 3 of this Regulation **for TPMS or Annex 4 of this Regulation for TPRS/ CTIS** and check that the TPMS/ TPRS/ CTIS warning and malfunction signals are transmitted as defined in paragraphs 2.2. and 2.3. of Part A of Annex 5 to this Regulation.”

II. Justification

1. At the seventy-fourth session of GRBP, TF TPMSTI presented Informal document GRBP-74-26 which was based on ECE/TRANS/WP.29/2021/10/Rev.1. GRBP generally supported GRBP-74-26 and invited TF TPMSTI to submit it to the next session in the form of an official document (ECE/TRANS/WP.29/GRBP/72, para. 27).
2. This official document follows the above invitation. It is based on ECE/TRANS/WP.29/2021/10/Rev.1, GRBP-74-26 and on the comments that TF TPMSTI has received after the seventy-fourth session of GRBP.
3. The original 00 series of amendments to UN Regulation No. 141 applies only to vehicles of category M₁ up to a maximum mass of 3,500 kg and N₁, when equipped with a tyre pressure monitoring system (TPMS) only.
4. The 01 series of amendments to UN Regulation No. 141 applies to vehicles of category M₁ up to a maximum mass of 3,500 kg, M₂, M₃, N₁, N₂, N₃, O₃ and O₄, when equipped with TPMS. In addition to TPMS, the tyre pressure refill system (TPRS) and the

central tyre inflation system (CTIS) were introduced in the 01 series of amendments to UN Regulation No. 141.

5. Paragraph 5.1.1.1. stated that “Tyre Pressure Refill System (TPRS) shall be deemed to be equivalent to a Tyre Pressure Monitoring System (TPMS) when the test criteria of Annex 4 are met. In this case TPMS is not requested to be installed.”

6. The same was stated in paragraph 5.1.1.2. for a central tyre inflation system: “A Central Tyre Inflation System (CTIS) shall be deemed to be equivalent to a Tyre Pressure Monitoring System (TPMS) when the test criteria of Annex 4 are met. In this case TPMS is not requested to be installed.”

7. All requirements to be fulfilled by TPRS and CTIS were noted in Annex 4 only. TF TPMSTI decided to move these requirements to paragraph 5. of this Regulation. The current proposal follows this approach. Paragraph 5. “Specification and test” is now valid for all three systems: TPMS, TPRS and CTIS. As a consequence, a lot of other paragraphs needed to be revised.

8. Annex 5, Part A, paragraph 2.1.1. and Part B, paragraph 3.1.1. were revised due to the comments received by the International Organization for Standardization (ISO) Working Group ISO/TC22/SC31/WG4 after the seventy-fourth session of GRBP:

- The time/date data were aligned with standard SAE J1939 PGN 65254.
 - As was already mentioned in the "Note", there is a known inconsistency between standards SAE J1939 and ISO 11992-2:2014.
 - ISO/TC22/SC31/WG4 informed the Task Force that ISO would solve this issue by revising standard ISO 11992-2:2014 in 2022.
 - From the new edition of standard ISO 11992-2 (2022) onwards, the time/date message and some of its constituent data identifiers will be listed but the contradictory byte order will no longer be defined directly within the ISO 11992-2 standard. Instead, where applicable, it will make reference to the SAE J1939DA standard.
 - Because the publication date of standard SAE J1939DA 202110 was 21 October 2021, the Time/Date Byte 1 to Byte 8 and the “Notes” in paragraph 2.1.1. of Annex 5, Part A, and in paragraph 3.1.1. of Annex 5, Part B were revised.
9. All text, tables and figures in this proposal are produced by TF TPMSTI.

III. Justification (Amendments to ECE/TRANS/WP.29/GRBP/2022/2)

1. References to Annex 7 and to Annex 8 (see ECE/TRANS/WP.29/2022/9) regarding TPMS/ TPRS/ CTIS were introduced in paragraph 5 to this Regulation.
