

SESSION I

**Prevention of industrial
accidents**

SESSION 1: DISCUSSION QUESTIONS

1. What are the most significant challenges in your country in taking measures for industrial accidents prevention (including in a transboundary context)?
2. Could you provide good practice examples of preventive measures in a transboundary context?
3. In your opinion, what is the most successful measure to prevent industrial accidents (including those with potential transboundary effects)?
4. How do operators and authorities take into account natural hazards in your country's or company's risk management?
5. Which benefits do you see in the integration of industrial/chemical accident risk as part of broader technological risk management into national or regional Disaster Risk Reduction (DRR) strategies?
