

SESSION 2

**Identification and notification of
hazardous activities**

SESSION 2: DISCUSSION QUESTIONS

1. Do you face any difficulties in applying the location criteria (air and water path) for the identification of hazardous activities? If so, which ones?
2. Are you aware that tailings management facilities should also be reported as hazardous activities under the Convention and notified to potentially effected countries? Should the location criteria be updated for tailings management facilities?
3. Does your country also apply the provisions of the Convention on a voluntary basis to other industrial facilities, such as pipelines? What is the added value generated by that in your country?
4. What challenges do you face in the process of notifying a neighboring country about your country's hazardous activities (if any)? Does your country have a defined notification form?
5. Have you been consulted by another country in its process of notifying a hazardous activity?
