

SESSION 5

**Scientific and technical cooperation
and exchange of information**

SESSION 5: DISCUSSION QUESTIONS

1. Has your country initiated or cooperated in the conduct of research related to the development of methods and technologies for the prevention of, preparedness for and response to industrial accidents?
2. In the context of scientific and technological cooperation and exchange of information, what are the main topics your country's currently focusing on?
3. Is there a need to initiate a transboundary scientific and technological cooperation and exchange of information?
4. Is there "only" a collaboration between governmental bodies or are industry/academic organization also involved?
