# Ministers Pledge to RoadMap Implementation

EUROPEAN FORUM FOR DISASTER RISK REDUCTION | PORTUGAL MATOSINHOS 2021

## PREVENTION PLEDGE: #PREVENTIONSAVESLIVES

Responding to the Intergovernmental Panel on Climate Change (IPCC) 2021 report which UN Secretary-General António Guterres warned is a "Code Red for Humanity";

Acknowledging increasingly frequent and severe disasters, including the COVID-19 pandemic, climate-related floods, fires and heatwaves which demonstrated the need for urgent and collaborative efforts;

Recognizing climate change, shifting demographics, new technologies, and the transition towards digital and green economies are transforming our approach to resilience;

Stressing the need for urgent, transformative, and collaborative action against existing, emerging, and future risks for a more disaster and climate-resilient Europe and Central Asian region;

And underlining that building resilience is an investment, not a cost.

We sign this Prevention Pledge,

Committing to making disaster prevention and resilience a priority and accelerating the implementation of the Sendai Framework for Disaster Risk Reduction 2015-2030 according to the EFDRR Roadmap 2021-2030.

1. We commit to promote greater investment in disaster resilience, as the greatest public good that can be delivered to protect the safety of our citizens. This means to promote all-of-society approaches, laws and actions to address future climate and disaster risks, leaving no one behind.
2. We commit to investing in a green and disaster resilient recovery to develop policies, strategies, investments, and action plans that integrate disaster resilience into sustainable development, climate adaptation, resilient infrastructure and environmental actions including with nature-based solutions. We promote resilient recovery considering accessible and inclusive multi-hazard early warning systems, encompassing existing, emerging, and future risks including future climate scenarios at all levels.
3. We commit to better understanding and communicating on existing, emerging, and future systemic risks. We will improve knowledge, monitoring and evaluation to support greater prevention for all hazards considering future climate impacts and those disproportionately affected by disasters.
4. We commit to enhance our efforts in promoting inclusive and collaborative risk governance and decision-making, strengthening collaborative regional and local action, and promoting multi-stakeholder approaches of vulnerable groups.
5. We pledge to collaborate, share knowledge and experience, and periodically review our progress at the European Forum for Disaster Risk Reduction.

Matosinhos, Portugal, 25 November, 2021

SENDAI FRAMEWORK FOR DISASTER RISK REDUCTION 2015-2030

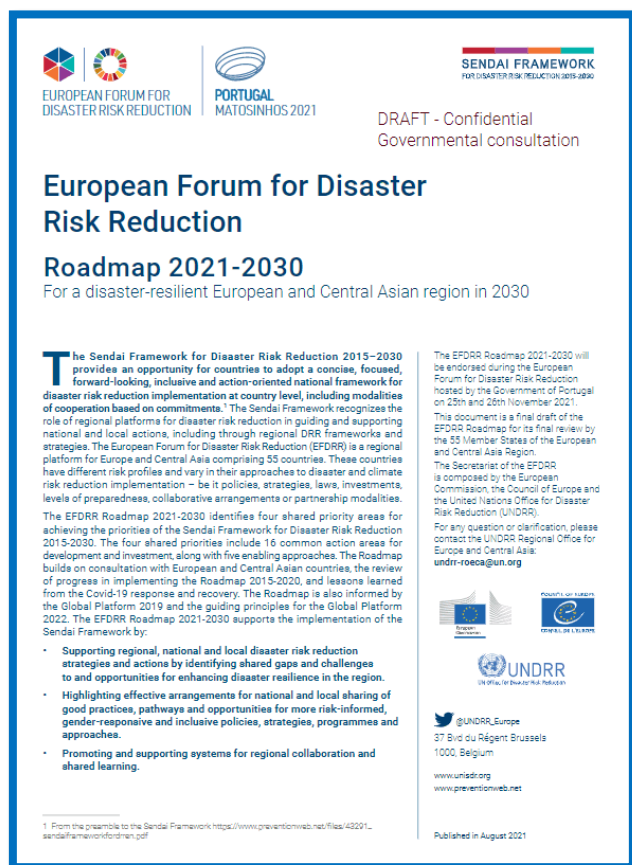

We sign this Prevention Pledge,

**Committing to making disaster prevention and resilience a priority and accelerating the implementation of the Sendai Framework for Disaster Risk Reduction 2015-2030 according to the EFDRR Roadmap 2021-2030.**

# EFDRR Roadmap 2021-2030

Backbone for coordinated and accelerated implementation of the Sendai Framework and related SDGs targets in Europe and Central Asia

Understanding and communicating existing, emerging and future systemic risks

Inclusive and collaborative systems for governance and decision-making

Supporting investments in resilience

Preparedness for response and resilient recovery

# Added value of the RoadMap 2021-2030

- Supporting regional, national, and local actions by identifying shared gaps, challenges, and opportunities.
- Spotlighting systems for national and local sharing of good practices for more risk-informed policies, strategies, programs, and approaches.
- Promoting and supporting systems for coordination and peer learning

Caucasus and Central Asia: Subnational INFORM risk 2021

# Synergies with the Industrial Accidents Convention

---

Industrial Accidents Convention : instrument for providing guidance for all-of-society, regional, transboundary and collaborative systems of governance and decision-making

Key synergies with the Sendai Framework priorities:

- Improving risk knowledge around NATECH risk (risk assessment)
- Strengthening risk governance in an all-hazards and whole-of-society approach

Potential in establishing a National Policy Dialogue:

- Offers a platform for strengthening DRR governance in the area of industrial safety
- Strengthens linkages with the National Platform and strategy for DRR

# Linking NDP with the national DRR agenda in Serbia

---

## Risk Governance

- Coordination by the Ministry of Interior
- National Platform for a whole of government approach
- National Disaster Risk Management Program (2015)
- Local level resilience: MCR2030

## Risk Knowledge

- Loss and damage data collection: Disaster Loss Database and Sendai Monitoring
- Risk assessment: Active engagement through EU regional cooperation (UCPM)

# DRR Agenda in Serbia

---

- The National program for disaster risk management (DRM) 2015 and is fully aligned with the Sendai Framework for Disaster Risk Reduction
- The National program is implemented via a DRM action plan (2017-2020).  
(New Action Plan is in development)
- According to the Action plan, the legislative framework allocates responsibilities throughout the DRR process.
- Legislative framework:
  1. National Disaster Risk Management Program
  2. Action plan for implementing NDRMP
  3. The Law on risk reduction and emergency management (2018)

# MCR2030 Initiative Serbia

---

- MCR2030 Initiative in Republic of Serbia is led by UNDRR - UN Office for Disaster Risk Reduction and its partners to **support Cities to Reduce Disaster Risk following the Sendai Framework for Disaster Risk Reduction 2015-2030 and the National Risk Management Program of the Republic of Serbia**
- The Initiative is supported by the Sector for Emergency Management, Ministry of Internal Affairs of the Republic of Serbia as Sendai focal point, and the Public Investment Management Office.
- **The launching of the MCR2030 initiative in Serbia is tied to the Law on Risk Reduction and Emergency Management**
- The MCR campaign in practice is a guide for city governments in planning resilience and decision-making, and in large part coincides with the LSG's obligations.
- 19 LSGs on board and close engagement with partners such as the Standing Conference of Towns and Municipalities

# Thank you
