

# Enhancing National Capacities to Develop and Implement Energy Efficiency Standards for Buildings in the UNECE Region

REGIONAL  
STUDY FOR 17  
COUNTRIES

Gap analysis between the performance objectives set forth in the Framework Guidelines for Energy Efficiency Standards in Buildings and current energy efficiency standards and their implementation in the countries of South-Eastern and Eastern Europe, the Caucasus, Central Asia, and in the Russian Federation

National studies analysed the energy performance of buildings, implementation of current building energy efficiency standards and provided country-specific recommendations on the possibilities to bridge the gap and enhance national capacity to develop and implement energy efficiency standards for buildings
