

Czech national forestry data platform preparation

ToS on Forest Products and Wood Energy Statistics

Indicators presentation – current state

- Annual report “Information on Forests and Forestry in the Czech Republic”
 - Online version in texts format (pdf)
 - Missing long-time series
 - Missing functional links on data sources
 - Full text only in Czech (shorten version in English)

Total annual timber harvest

Harvest	Unit	2000	2010	2015	2017	2018	2019
Conifers	mil. m ³	12.85	15.07	14.38	17.74	24.21	31.31
Broadleaves		1.59	1.67	1.78	1.65	1.48	1.27
Total		14.44	16.74	16.16	19.39	25.69	32.58
Per capita	m ³	1.41	1.59	1.53	1.83	2.42	3.05
Per 1 ha of forest		5.48	6.30	6.06	7.26	9.61	12.18

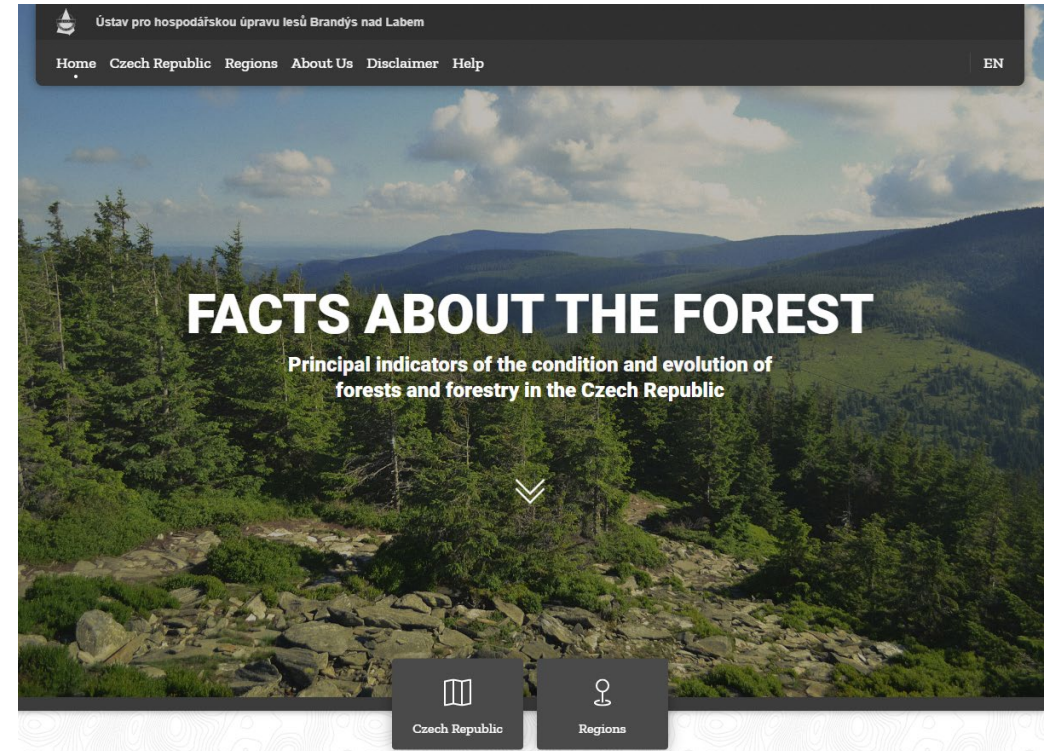

Note: Volumes are given in m³ under bark, minimum top diameter 7cm.

Intention to prepare a new data platform – “Facts about the forest”

- one common platform for the main indicators
- user-friendly way of presentation
- possibility to freely download, use or share presented data, maps and graphs
- functional links on original data sources
- CZ and EN version, with possible extension

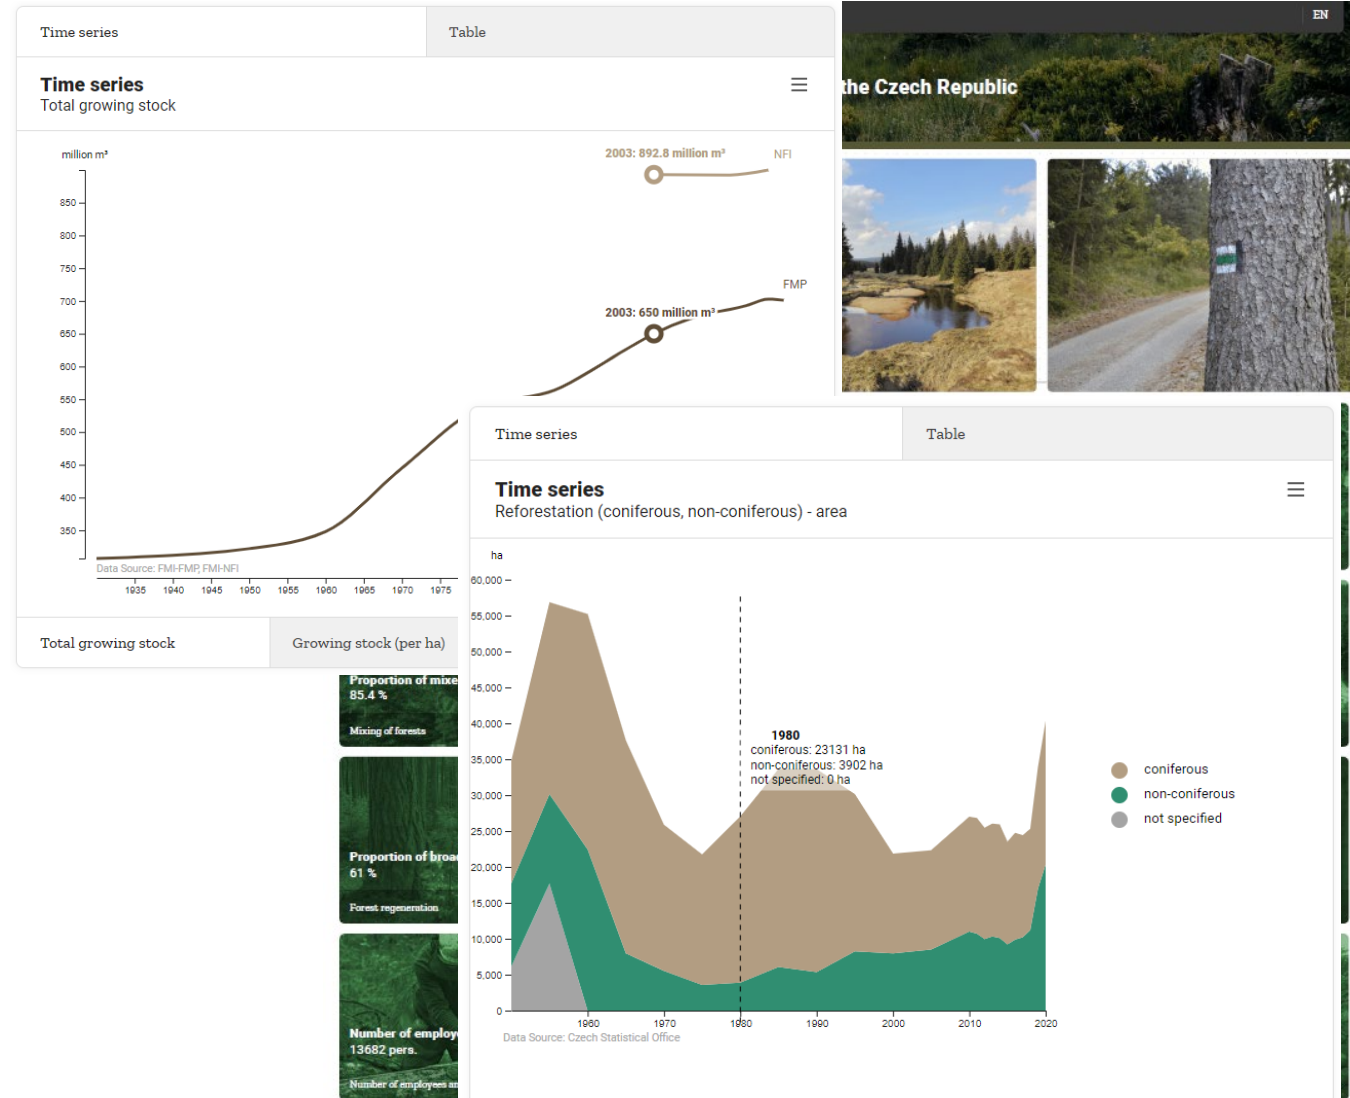

INForest

- **inspiration** how to process a new national platform in an interactive way
- translation INForest to Czech
 - information about structure of the webpage
 - simple management of data and texts
 - simple to add a new language version
 - adapted to mobile phones
- **approval of UNECE** for the use of source code of INForest for national platform

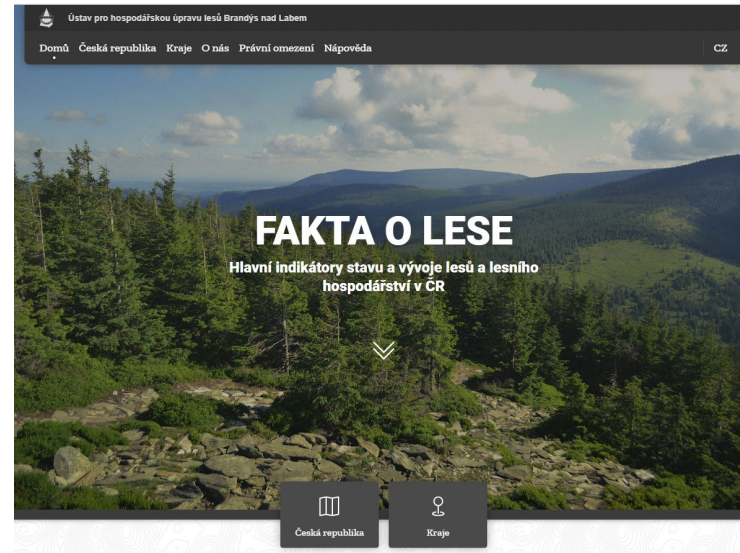

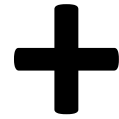

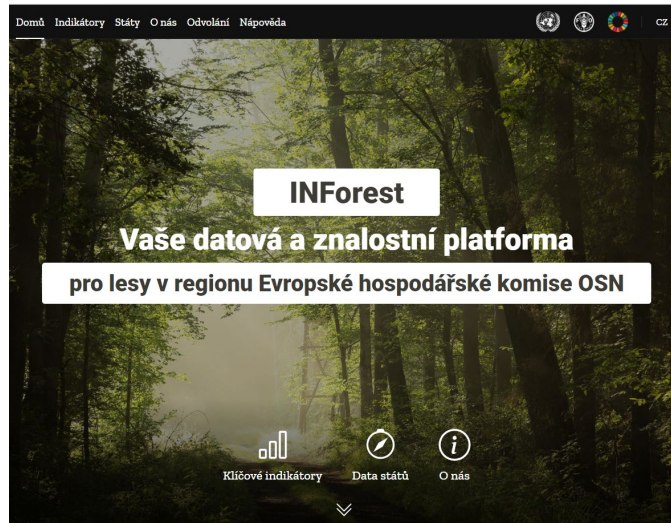

Facts about forest

- Realization since autumn 2021
- Country level and Regions level
- indicators (12), subindicators (39)
- Forest management plans x NFI data
 - combination in graphs
 - explanations of differences
 - links on detailed results
- new type of graphs

Time to change - Realization

**win-win
solution for
Czech users**

International comparison (countries)

National comparison (regions)

Thank you to

- **UNECE for approval to use INForest's source code**
- **Andrzej Talarczyk and Arkadiusz Gąsiorowski for realization**

Michal Synek
Forest Management Institute Czech Republic
