Global Conference on "Macroeconomic Statistics for the Future"

Palais d'Egmont, Brussels,
10-11 November 2022

Co-organised by Eurostat and UNSD, with support from ISWGNA and UN Network of Economic Statisticians

A global event that will gather high-level participants from all the regions of the world

A major occasion to exchange ideas between users and producers of macroeconomic statistics on emerging recommendations in the SNA and BPM update process

An opportunity to discuss visions for the further development of macroeconomic statistics

In line with UNSC's decisions on SNA update roadmap and UN Network of Economic Statistician's work programme on stakeholders' engagement

Draft programme

The conference will be opened and closed by high-level panel discussions:

- ✓ Opening: user perspective
- ✓ Closing: take-home messages from the producers' perspective

4 sessions on the SNA update priority areas:
i) Communication, ii) Beyond GDP,
iii) Digitalisation, iv) Globalisation

One session organised by the
UN Network of Economic Statisticians,
providing an overview, activities and
regional consultations

Expected participants

Around 250 high-level participants from all the regions of the world, including:

- ✓ High-level users of macroeconomic statistics from across world regions

- ✓ Heads or Directors of National Statistical Institutes from all the world regions

- ✓ Directors General or Directors of the statistics division of regional, international and supra-national organisations

Invitations will be sent in due course
