Impact of Transport Inventions

Globalisation

Territorial cohesion

Equity and democracy

Shrinking world

Integrated transport

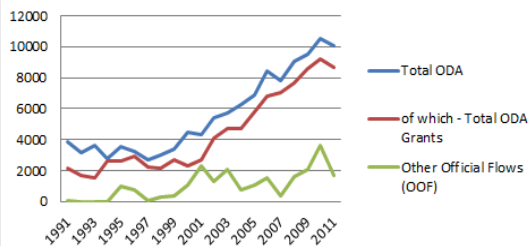

Safety, air and noise pollution, congestion ...

Surface transport to double in thirty years

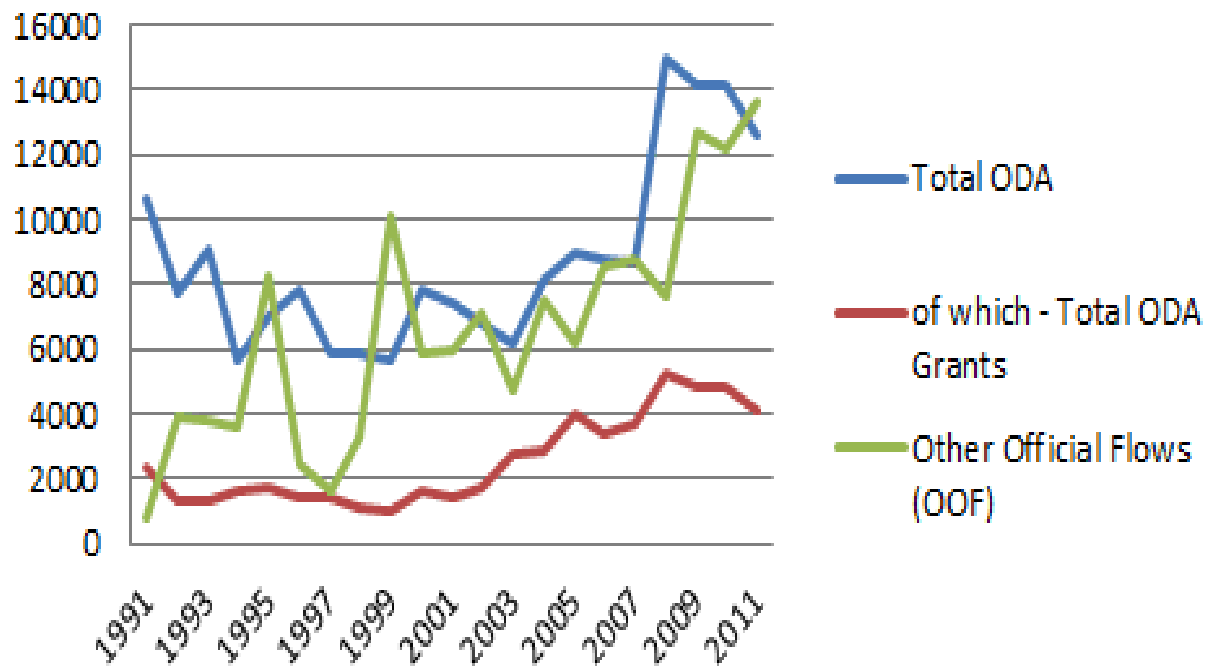

OED flows after the MDGs

Health, Total Aid (ODA), 1991-2011
Constant Prices (2011 USD mil.)

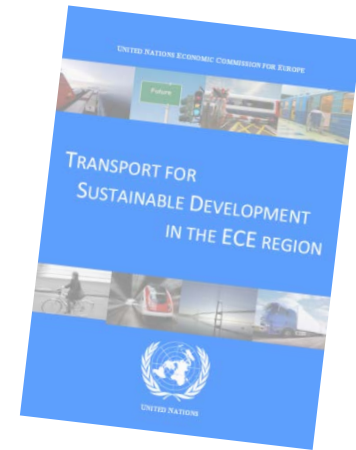

Transport, Total Aid (ODA), 1991-2011
Constant Prices (2011 USD mil.)

Transport for Sustainable Development

1. Accessibility: Providing access to international markets and social services
2. Affordability: Making mobility affordable for the individual and the society
3. Safety: UN decade of action for road safety
4. Environmental sustainability through regulations, technology and behavior
5. Integrated transport systems: The current modal split is an overarching sustainability concern.
