Informal document GRVA-14-29
14th GRVA, 26-30 September 2022
Provisional agenda item 4(c)

National/Regional DSSAD requirements & need for harmonization

Current status & need for harmonization of DSSAD requirements

- UN R157 includes several references to additional national/regional legislation including possible legislation for technical requirements on the data availability, access and retrieval (e.g. 8.1, 8.4.1, 8.4.3.3, 8.4.5.3)
- Per the [request](#) of WP.29 at their 178th session (June 2019) and the [request](#) at their 180th session (March 2020) the IWG on EDR/DSSAD was tasked to provide information on the existing national/regional activities on DSSAD
- The IWG started drafting the document EDR-DSSAD-04-04 in January 2020, submitted an updated version as [GRVA-13-06](#) to GRVA in May 2022 and a further updated version during SG-DSSAD-10
- While the information in GRVA-13-06/ EDR-DSSAD-04-04 are helpful for manufacturers they are not exhaustive and do not solve every open issue and question. Currently identified issues are:
 - a) Requirements of some CPs on e.g. **data availability seem to be in contradiction** to each other:

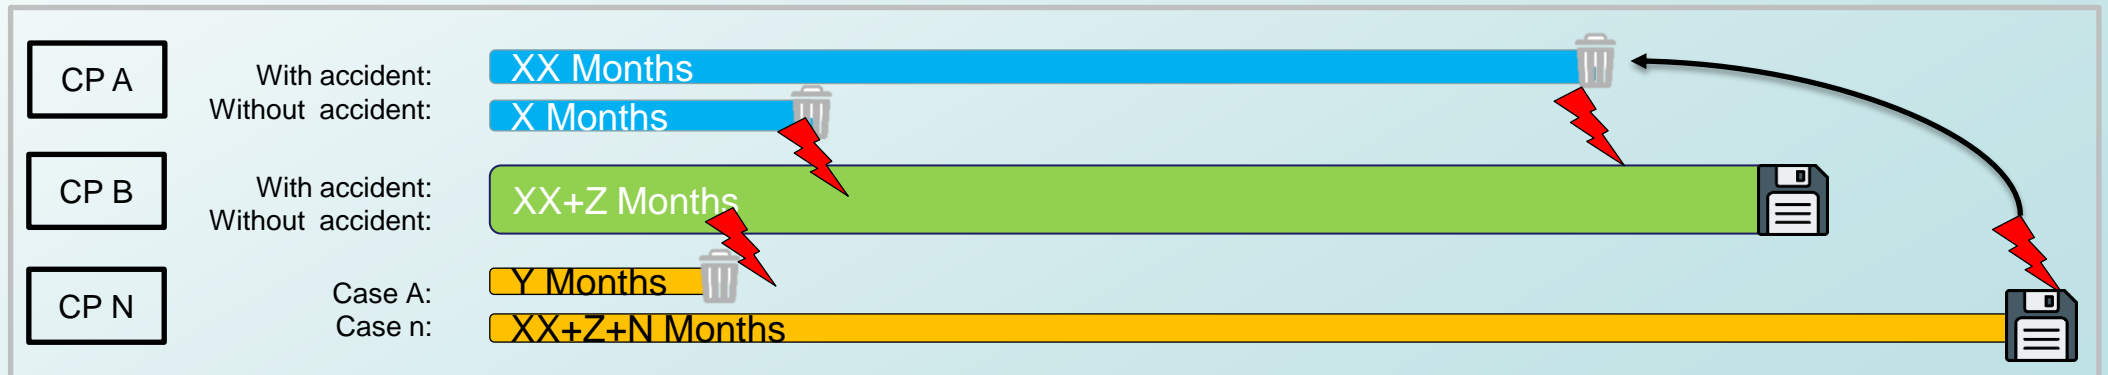

Fig. 1: National/regional requirements for DSSAD storage duration of different CPs

- a) Some CPs seek to store **additional data elements** (e.g. for location) which is **not mandated** by UN R157
- **Industry seeks clarification & harmonized requirements (further discussions in DSSAD IWG required)**
