working with refugees, modalities for refugee feedback and consultation, supporting effective and culturally and socially sensitive refugee integration pathways

04

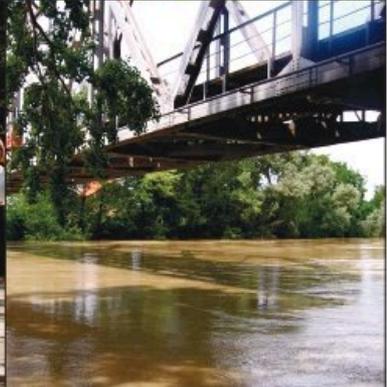

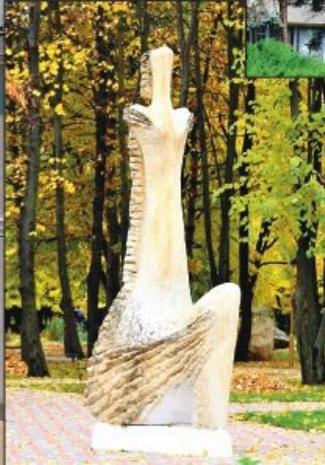

Interaction with the local community

collaborating with the local community and mobilizing local support, communicating with the public and combating xenophobic manipulation

05

Cooperation with community groups and organizations

Areas of city development

Areas of city development

- sustainable spatial development;
- development of a comfortable urban environment;
- socio-demographic development;
- modernization of the road infrastructure to periphery and rural areas;
- socio-economic development of the territory, attracting foreign and local investments;

Areas of city development

- the development of transport infrastructure, modernization of public passenger transport with an emphasis on the introduction of green transport;
- the development of the historical-cultural and tourism sectors;
- developing the potential of natural heritage and environmental protection;
- measures to prevent and adapt to climate change;
- expansion and rehabilitation of public utility networks.

**The need to create
the conditions for
placing children in
preschool and
educational
institutions**

**The likelihood of a new
wave of migrants**

Immediate challenges

**Lack of spaces for
temporary
accommodation**

**Employment of
refugees**

Strategic action points:

“The town of Ungheni doesn’t have an efficient connection with the EU, despite the Optimal geo-location”

An important measure that would improve the connection between the city of Ungheni and the EU would be the alignment with European standards in all fields of activity. Regarding the refugee crisis, we refer to the identification and construction of a center for their shelter.

The municipality of Ungheni is called the western capital of the Republic of Moldova, being on the border with the European Union

01

We have the opportunity to build a vehicle bridge across the river Prut that separates Moldova and Romania. This bridge would shorten the distance between Ungheni and Iasi from 50 to 20 km.

02

The municipality of Ungheni has many projects implemented with funding from the European Union
