Modernizing Resource Management

Optimizing the circularity of resources with Resources as a Service

Resources from Cornwall (SW England) have been mined, and are now lost from the system

- 4000 years mining
- tin, tungsten, copper
- 1.6 million tonnes tin
- 1 million tonnes copper
- Where is it now?

Who might be the 'better owners' ?

Miner (might large companies lease resources??)

Smelter/refiner (**recycling service**)

Metals trading e.g. LME – new model??

Metal product manufacturer

Manufacturing industry
(**Lease, reconditioning**)

Retail/Service
(**rental/lease**)
