

Proposal for Supplement 4 to the 04 Series of Amendments to UN Regulation No. 110 (CNG and LNG vehicles)

Submitted by the experts of NGVA Europe

The text reproduced below was prepared by the experts from NGVA Europe to introduce a missing transitional provision to 04 series. The modifications to the current text of the regulation are marked in bold characters and strikethrough for deleted characters.

I. Proposal

Insert a new paragraph 24.25Bis (transitional provisions), to read:

“24.25Bis Notwithstanding paragraphs 24.23 and 24.25, Contracting Parties applying this Regulation shall continue to accept type approvals of the vehicles, equipment or parts issued according to the preceding series of amendments to this Regulation which are not affected (all but CNG accumulators, CNG compressors, secondary engines and non-metallic parts compatible with heat exchange fluids (when applicable)) by the 04 series of amendments.

II. Justification

All series of UN Regulation 110 but 04 contain a transitional provision which accept the type approvals according to the preceding series when not affected by the provisions of the new series. The transitional provisions mentioned are listed in the following table:

01 series	par. 24.3
02 series	par. 24.13
03 series	par. 24.20
05 series	par. 24.30
06 series	par. 24.34 (pending approval)

Therefore it is needed to keep consistency throughout all the series of amendments to the UN Regulation and thus introduce such provision also for 04 series because it is still in force. As requested by some delegates, in the paragraph 24.25Bis above there are listed the components affected by the new series.
