Statistic data in CZ

Legal background

- Act No. 89/1995 on state statistic service and relevant regulation
- According to specific regulations, MoT is responsible for acquiring data in various transport areas with various

Methodology of data

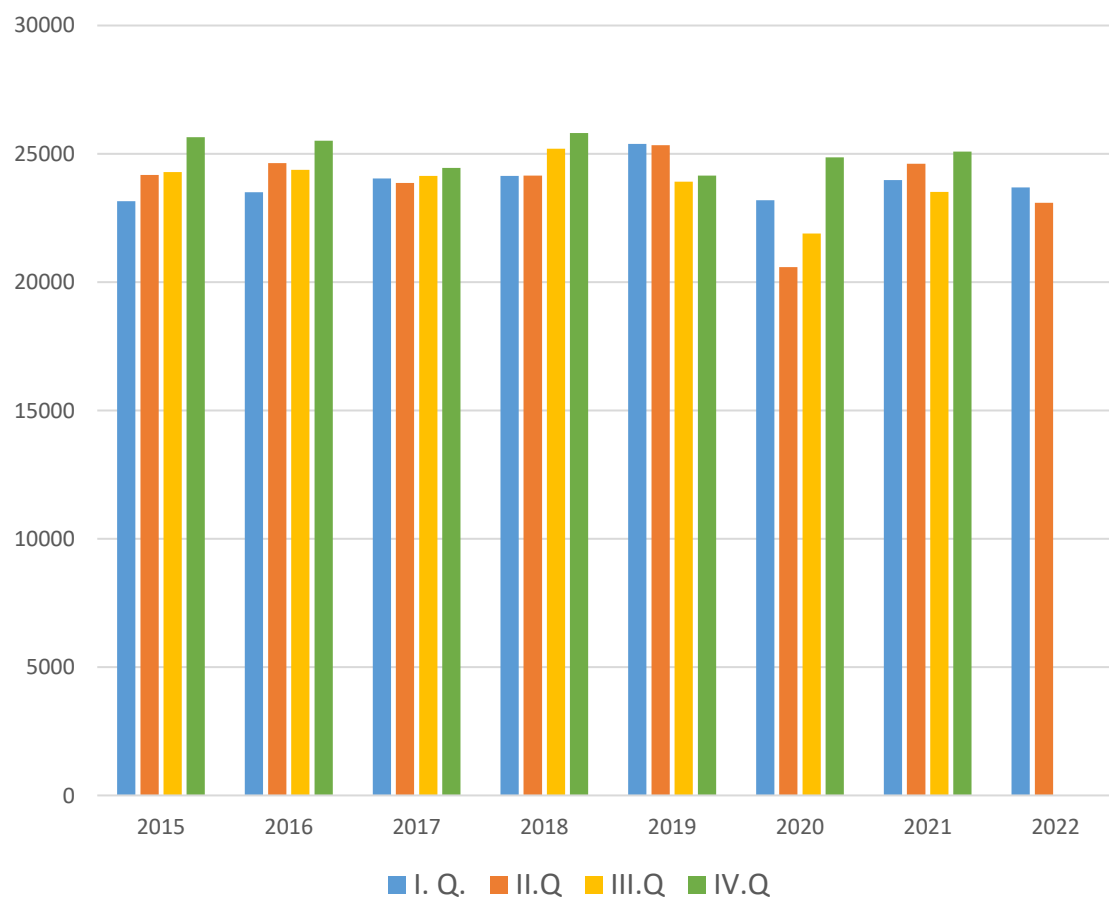

- One sheet for combined transport for every calendar year
 - intermodal transport units (ITUs) - containers, swap bodies, semi-trailers, lorries and Innofreight and ACTS containers – both loaded and empty
- Classification of data
 - domestic and international transport (import, export, transit)
 - number of consignments, netto, brutto tonnes, tonne-kilometres, TEU transported and number of combined transport trains

Eurostat – Regulation No. 223/2009 of EP and Council on European statistics and EC Decision 2012/504/EU on Eurostat

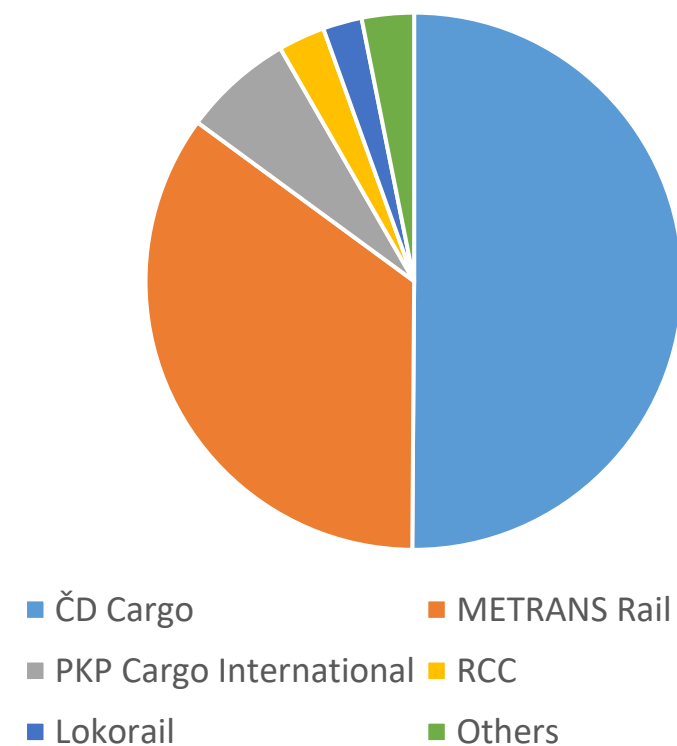

Processing of data

- All **railway undertakings** operating the combined transport trains have to fill in this sheet
 - by March of the following year
- The **Infrastructure Manager (IM)** sends MoT the list of railway undertakings operating the combined transport trains in a given year
 - and MoT sends IM the sheet with methodology
- All data are collected and counted by MoT Rail Transport Department
- Summary overview of processed data is published in the **Statistical Yearbook of Transport.**

**Development of freight transport by rail
- in thousands tons**

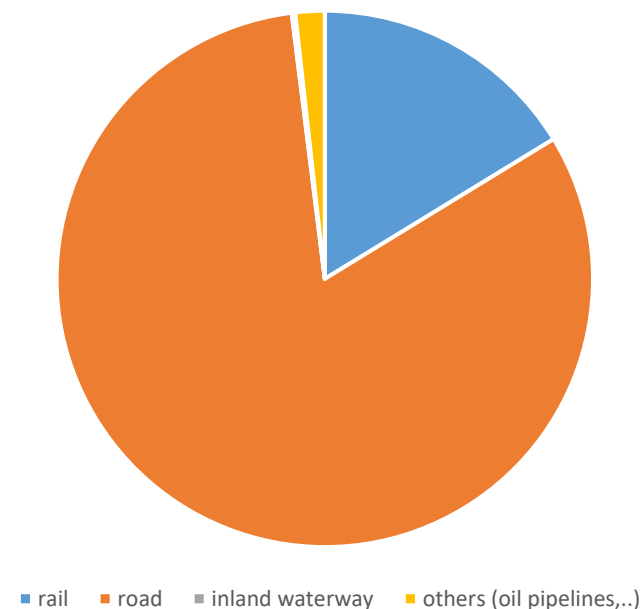

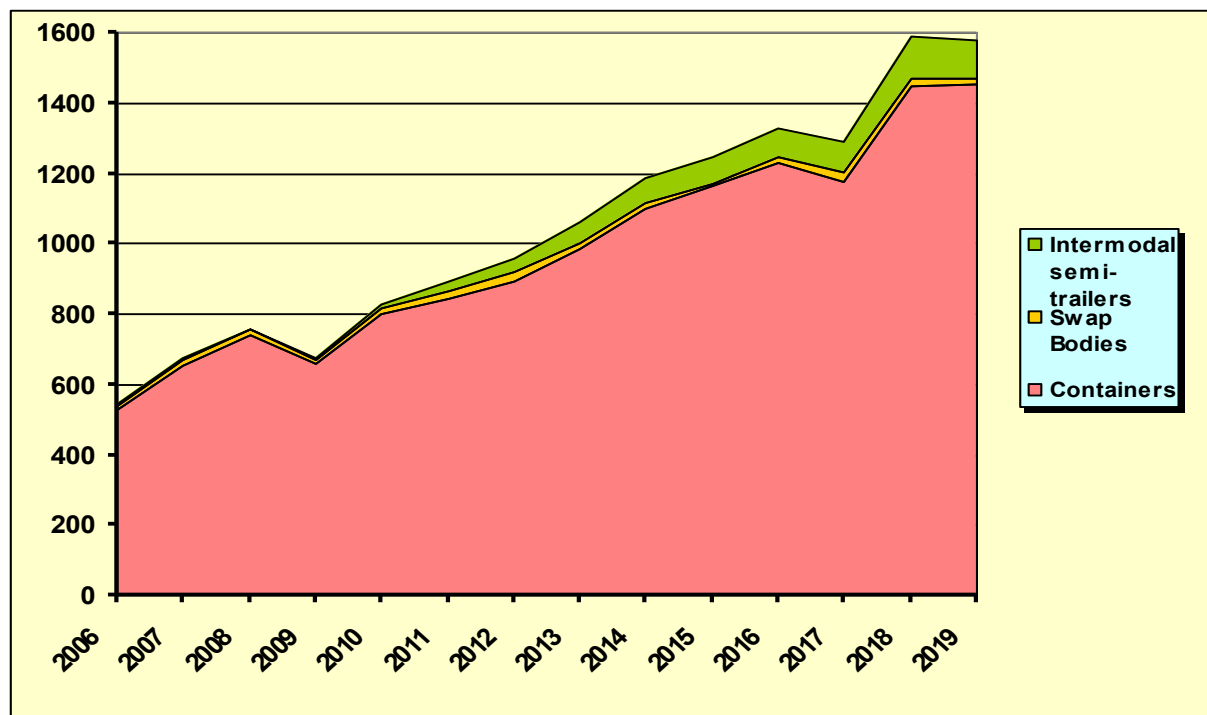

**The share of individual railway carriers by volume in
1.Q/2022 in Combined transport - statistic data from
IM (product factor P4) in %**

Statistic data

Combined transport – development from 2006 (figures in thousands TEU) vs. Transport Yearbook of MoT

The possibility of moving 30 % of road freight transport to railways by 2030 will be a **challenging task** for Czech Republic (figures thousands tonne)

- **Road** freight transport in 2015 = 438 908; 2021 = 500 288
- **Rail** freight transport in 2015 = 97 280; in 2021 = 99 550
 - **Planned moving** from road to rail in 2015 = 131 671; in 2021 = 150 086

Thanks for your attention
