

Item 6 (a)

Emerging issues in freight transport and logistics / Issues, trends and performance in the industry

Collaborative networks

ECE/TRANS/WP.24/2022/6

Resolution on strengthening intermodal freight transport

Invites WP.24 to

- Consider supporting collaborative networks for flexible transport planning processes and integration of modes and for strengthening the voice of the intermodal industry

64th session – collect information on good practice

Good practice – flexible transport planning processes

- Booking platforms to integrate shippers and customers into CT
 - Railflow
 - Modality
 - PhysICAL

Good practice – integration of modes

- Integration of intermodal actors
 - KV 4.0 (data hub)
 - German specification on standardized data exchange

Good practice – strengthening the voice of intermodal industry

- Interest groups

- AGORA
- SGKV platform
- PRIME
- RailNet Europe

- Role of e-learning
- Transport plans targeting specific intervention

Way forward

Any role for WP.24?

- Support self-learning by developing e-courses?
- Recommend specific interventions for improved combined transport
 - E.g. like:
 - with AGTC implementation monitoring
 - with ECMT implementation (and recommendations for policy directions)
